FrontRange Solutions Software Product: GoldMine® Integration Services
(Rev. Oct. 2005v2)

END-USER LICENSE AGREEMENT ("EULA")
IMPORTANT – READ CAREFULLY

THIS EULA IS A LEGAL AGREEMENT BETWEEN YOU ("YOU" OR "LICENSEE") AND FRONTRANGE SOLUTIONS USA INC., A COLORADO CORPORATION ("FRONTRANGE SOLUTIONS"), FOR FRONTRANGE SOLUTIONS SOFTWARE PRODUCT, WHICH INCLUDES COMPUTER SOFTWARE AND ASSOCIATED MEDIA AND DOCUMENTATION (COLLECTIVELY "LICENSED SOFTWARE"). BY OPENING THE SOFTWARE PACKAGING, COMPLETING THE ACTIVATION PROCESS, OR DOWNLOADING, INSTALLING, ACCESSING OR UTILIZING THE LICENSED SOFTWARE OR CLICKING THE "I ACCEPT" BUTTON, YOU AGREE TO BE BOUND BY THE TERMS OF THIS EULA. IF YOU DO NOT AGREE WITH THE TERMS OF THIS EULA, PROMPTLY RETURN THE UNUSED LICENSED SOFTWARE TO THE PLACE FROM WHICH YOU OBTAINED IT FOR A REFUND.

1. **1. Protection/Ownership.** The Licensed Software may include software owned by third-parties (collectively "Third-Party Owners"). The Third-Party Owners are third-party beneficiaries of this EULA and You agree to be bound to them under all the terms and conditions of this EULA, unless and to the extent that a separate license agreement for such software governs. The Licensed Software is protected by copyright and other intellectual property laws. FrontRange Solutions or a Third Party Owner retain ownership of the Licensed Software and the copies of the Licensed Software provided herewith. The Licensed Software is licensed to Licensee for use subject to the terms set forth in this EULA. You agree that this is a license only and that no title passes to You. You agree not to challenge FrontRange Solutions' rights in or otherwise attempt to assert any rights in the Licensed Software, except those provided under this EULA.
2. **Grant and Scope of License.** Subject to the terms and conditions of this EULA, FrontRange Solutions hereby grants to Licensee, and Licensee fully accepts upon delivery, a nonexclusive, nontransferable and perpetual (unless earlier terminated as provided below) right to use only the executable version (not source code) of the Licensed Software for its own internal business purposes. Your right to use the Licensed Software is limited to only the licensing limits (such as users, assets, modules, technology foundation, databases and other features and benefits) that You have ordered and paid for in accordance with the applicable purchase order or other order documentation. You may use the Licensed Software only as expressly permitted under this EULA and in accordance with the accompanying Documentation and any other written instructions provided by FrontRange Solutions. Certain Licensed Software modules may require that You have a valid license for a specific version (such as the last corresponding version) of a corresponding FrontRange Solutions module, technology foundation product or other application, or product of a third party, and may terminate upon termination of such other product license.
3. **Restrictions.** You agree not to copy the Licensed Software, unless and except as expressly permitted in the accompanying Documentation. If You make such permitted copies of the Licensed Software, the original copy of the Licensed Software and all copies that You make may not leave your control, and title to all copies remain with FrontRange Solutions and/or a Third Party Owner. You agree not to modify, decompile, translate, disassemble or reverse engineer the Licensed Software or otherwise attempt to discover any source code or underlying confidential or proprietary information. You agree not to distribute, rent or lease any portion of the Licensed Software (including any feature enabled by the Licensed Software). You agree not to use any portion of the Licensed Software (including any feature enabled by the Licensed Software) in a commercial hosting, application service provider environment, service bureau or managed service or otherwise commercially exploit the Licensed Software. You may not create any derivative works to the Licensed Software except to facilitate Your permitted use of the Licensed Software, provided that Your use of such limited derivative works is subject to the same restrictions as described in this EULA (including the restrictions on distribution, rental, hosting or other commercial exploitation of such limited derivative works). You acknowledge that the Licensed Software contains information deemed confidential or otherwise proprietary to FrontRange Solutions or a Third Party Owner, and You agree to handle the Licensed Software with at least the same degree of care employed with respect to Your own confidential or

proprietary information.

4. **License Limits.** As mentioned above, Your use of the Licensed Software is limited to certain features and benefits based upon the specific license limits that You have ordered and paid for. License limits on the Licensed Software may include one or more of the following: technology foundation; named user; concurrent user; server; database and/or asset. The definition and applicability of any of these license limits are defined by the order and pricing document, the Documentation and other written agreement between You and FrontRange Solutions related to the specific version of the Licensed Software at the time You license the Licensed Software. For any additional or future acquisitions of the Licensed Software or any other FrontRange Solutions product, FrontRange Solutions may at any time change the definition or applicability of these license limits or any other features, benefits, products or pricing at any time without notice.

Should You exceed any of Your license limits, then You agree to pay the then applicable full list price for the excess usage in accordance with FrontRange Solutions pricing program, as well as the full Maintenance and Support Fee related to these additional products. Different modules of the Licensed Software may install separately within the Licensed Software package, however, all the software enabled and/or installed are subject to the terms and conditions of this EULA.

5. **Installation and Verification.** The installation and verification of the Licensed Software may entail completion of a serialization and/or license file deployment procedure in which You will be required to enter serialization code(s) and/or install license file(s) ("Activation Keys") provided to You as a part of the Licensed Software. You agree not to share the Activation Keys provided to You to any third party other than an authorized FrontRange Solutions reseller ("Reseller") with which You have engaged. The Activation Keys indicate to the loaded Licensed Software the software features and/or modules enabled with licensed configuration limits as applicable, including (i) number of authorized concurrent users, named users and/or assets covered by the license; (ii) server restrictions; (iii) database restrictions; and (iv) technology foundation restrictions. You may be required to electronically register the Licensed Software to one application server machine or other physical device by connecting to FrontRange Solutions' activation or registration servers (or website). Further, the Activation Keys system may disable Your use of the Licensed Software in the event You attempt to exceed or otherwise violate the terms of this EULA.

6. **Privacy.** The installation process may require you to register the Licensed Software with user information and the Licensed Software may contain an automated audit tool whereby FrontRange Solutions will receive notification of Your licensed limits and user information. Any personal information collected (1) will be used solely for registration and license limit auditing purposes for the Licensed Software and to provide You with important information about the Licensed Software, (2) will be stored in computer servers with limited access that are located in controlled facilities and/or under SSL protocol, (3) may be stored and processed in the United States or any other country in which FrontRange or its affiliates, subsidiaries or agents maintain facilities and by using this Licensed Software, you consent to any such transfer of information outside of your country, (4) may be stored indefinitely, (5) will not be shared with any government agency, private organization, or the public, except with Licensee's name as a reference company in the context of sales presentations and marketing activities.

7. **Ongoing Audit.** Certain Licensed Software require that FrontRange Solutions periodically audit Your use of the Licensed Software to verify Your compliance with Your license limits, and in most instances, such audits will be performed remotely through electronic access to the Licensed Software. You agree to permit FrontRange Solutions (or its agent) to electronically monitor and/or audit Your use of the Licensed Software for the sole purpose of verifying Your compliance with the terms of Your license.

8. **Updates.** If the Licensed Software is an Update (defined as an upgrade, modified version, updates, addition, and copies of the Licensed Software, if any, made generally available by FrontRange Solutions as an "Update" to the Licensed Software to those customers with a valid and current maintenance agreement with FrontRange Solutions) to a previous version of the Licensed Software, you must possess a valid license to such previous version in order to use such Update. All Updates are provided to You on a license exchange basis. You agree that by using an Update You voluntarily terminate Your right to use any previous version of the Licensed Software; provided, however, that you may continue to use previous

versions of the Licensed Software solely to assist You in the transition to the Update.

9. **Transfer.** To the maximum extent permitted by applicable law, Licensee may not resell or otherwise transfer for value the Licensed Software. Notwithstanding the foregoing, Licensee may assign all of its licensed rights and duties under this EULA to a third-party that: (a) directly or indirectly controls Licensee; (b) is controlled by or under common control with Licensee; or (c) purchases all or substantially all of Licensee's assets; provided, however, that (i) Licensee gives written notice to FrontRange Solutions of the transfer or assignment; (ii) the permitted third-party assignee agrees to be bound by all the terms herein and completes and returns a registration card or other requested transfer documentation to FrontRange Solutions; and (iii) in no circumstance shall any transfer or assignment, unless specifically agreed upon in writing, (y) release Licensee from any prior outstanding obligation under this EULA, or (z) allow Licensee or Licensee's transferee or assignee, collectively, to utilize more software features, users and/or modules than authorized under this EULA and Your order documentation. If You transfer the Licensed Software, You must simultaneously transfer possession of all associated media and documentation, and remove all Licensed Software from Your computers.
10. **Links to Other Software.** Use of the Licensed Software may provide links, integrations or "publishing" access to separate third-party software. FrontRange Solutions provides such links, integrations or "publishing" access as a benefit only and such access does not change the license rights of the separate third-party software. You must determine if Your use of the separate third-party software as accessed through the Licensed Software is in compliance with the respective third-party software end-user license agreement.
11. **Links to Third-Party Sites.** You may link to third-party sites through the use of the Licensed Software. FrontRange Solutions is providing such links to you as a convenience only. FrontRange Solutions does not generate or control the content of the third-party sites and is not responsible for and does not endorse the policies, practices or contents of any third-party sites.
12. **Warranty/Remedy/Limitation of Liability.** TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, THE WARRANTY AND REMEDY SET FORTH BELOW ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES AND REMEDIES, ORAL OR WRITTEN, EXPRESSED OR IMPLIED. Except as provided for in this EULA, no FrontRange Solutions reseller, partner, dealer, agent or employee is authorized to modify or add to the following warranties and remedies.

FrontRange Solutions warrants that for a period of ninety (90) days following delivery of the Licensed Software (i) the media on which the Licensed Software is furnished shall be free from defects in materials and workmanship under normal use; and (ii) the Licensed Software will perform substantially in accordance with FrontRange Solutions' user documentation accompanying the Licensed Software. FRONTRANGE SOLUTIONS DOES NOT WARRANT THAT THE LICENSED SOFTWARE WILL MEET YOUR REQUIREMENTS OR THAT THE OPERATION OF THE LICENSED SOFTWARE WILL BE UNINTERRUPTED OR ERROR FREE OR THAT ALL DEFECTS WILL BE CORRECTED. THIS LIMITED WARRANTY IS VOID IF FAILURE OF THE LICENSED SOFTWARE HAS RESULTED FROM ACCIDENT, ABUSE, MODIFICATION, OR MISAPPLICATION OF THE LICENSED SOFTWARE.

If You believe there is a defect in the Licensed Software such that it does not meet the Limited Warranty provided above, You must notify FrontRange Solutions in writing within the 90-day warranty period. FrontRange Solutions' entire liability and Your exclusive remedy with regard to the Limited Warranty, shall be, at FrontRange Solutions' sole discretion, either repair or replacement of the Licensed Software or a refund of the amount paid to FrontRange for the Licensed Software (provided in that case that You also return the Licensed Software). Any repaired or replacement Licensed Software shall be warranted for the remainder of the original warranty period.

To the maximum extent permitted by applicable law, except as provided above, FRONTRANGE SOLUTIONS MAKES NO WARRANTY OR REPRESENTATION, EITHER EXPRESSED OR IMPLIED WITH RESPECT TO THE LICENSED SOFTWARE, ITS QUALITY, PERFORMANCE, NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR A PARTICULAR PURPOSE.

UNLESS BOTH EXPRESSLY REPRESENTED AND AGREED IN WRITING, THE LICENSED SOFTWARE IS NOT DESIGNED, OR INTENDED FOR USE IN ANY MEDICAL, LIFE SAVING OR LIFE SUSTAINING SYSTEMS, TRANSPORTATION SYSTEMS, NUCLEAR SYSTEMS, OR FOR ANY OTHER MISSION CRITICAL APPLICATION IN WHICH THE FAILURE OF THE LICENSED SOFTWARE COULD CREATE A SITUATION WHERE SUBSTANTIAL PROPERTY DAMAGE OR PERSONAL INJURY OR DEATH MAY OCCUR. FRONTRANGE SOLUTIONS AND ANY THIRD-PARTY OWNERS RECOMMEND AGAINST, AND DISCLAIM ANY LIABILITY FOR, USE OF THE LICENSED SOFTWARE IN ANY SUCH APPLICATION.

You understand and acknowledge that FrontRange Solutions will not be liable for network-related problems attributable to the operation of the Licensed Software and that network configuration changes may affect the system's performance.

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, AND EXCEPT FOR LIABILITY ARISING UNDER THE INDEMNIFICATION PROVIDED BELOW, FRONTRANGE SOLUTIONS' ENTIRE LIABILITY UNDER THIS EULA SHALL BE LIMITED TO THE AMOUNT PAID BY YOU TO FRONTRANGE FOR THE LICENSED SOFTWARE.

IN NO EVENT WILL FRONTRANGE SOLUTIONS BE LIABLE FOR INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LICENSED SOFTWARE, even if advised of the possibility of such damages. In particular, and without limitation, FrontRange Solutions shall have no liability for any data stored or processed with the Licensed Software, including the costs of recovering such data.

13. Indemnification. FrontRange Solutions will defend, indemnify and hold Licensee harmless from any third party claim that the Licensed Software infringes any copyright, trademark or trade secret owned or controlled by the third party; provided, however, that (i) FrontRange Solutions shall be notified promptly in writing by Licensee of any such claim; (ii) FrontRange Solutions shall have sole control of the defense of any action on such claim and all negotiations for its settlement or compromise; (iii) Licensee shall cooperate with FrontRange Solutions, at FrontRange Solutions' expense, in a reasonable way to facilitate the settlement or defense of such claim; (iv) such claim does not arise from Licensee's modifications not authorized by FrontRange Solutions; and (v) should the Licensed Software become, or in FrontRange Solutions' opinion likely to become, subject to such claim of infringement, then Licensee shall permit FrontRange Solutions, at FrontRange Solutions' option and expense, either (a) to procure for Licensee the right to continue using the Licensed Software, or (b) to replace or modify the Licensed Software so that it becomes noninfringing and performs in a substantially similar manner to the original product, or (c) upon failure of (a) or (b), despite the reasonable efforts of FrontRange Solutions, to terminate this EULA and return the license fee paid by Licensee for the Licensed Software pro-rated over a four (4) year life span. THE FOREGOING INDEMNIFICATION IS LICENSEE'S SOLE AND EXCLUSIVE REMEDY AND FRONTRANGE SOLUTIONS' SOLE AND EXCLUSIVE OBLIGATION WITH RESPECT TO THE INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS.

14. Maintenance and Support. FrontRange Solutions provides maintenance and/or technical support (including upgrades and enhancements) for the Licensed Software only through separate agreements. Please contact FrontRange Solutions or the place from which You obtained the Licensed Software if You wish to obtain maintenance and/or technical support through the execution of such an agreement.

15. Compliance; Export Control; Privacy. You must comply with all applicable laws and regulations in Your use of the Licensed Software. You may not export, ship, transmit, or re-export the Licensed Software in violation of any applicable law or regulation, including, without limitation, the Export Administration Regulations issued by the United States Department of Commerce, or any such similar law or regulation issued by such other governmental entity which may have jurisdiction over such export. Further, You agree to abide by all applicable data protection, SPAM, privacy, communication and similar rules, directives and other laws in Your use of the Licensed Software.

16. United States Government Restricted Rights. THIS SECTION APPLIES ONLY TO LICENSING OR USE

BY THE FEDERAL GOVERNMENT OF THE UNITED STATES. The Licensed Software is provided with RESTRICTED RIGHTS. Use, duplication, or disclosure by the federal government is subject to restricted rights as set forth in subparagraph (c) of The Rights in Technical Data and Computer Software clause at 252.227-7014 for DOD contracts and at FAR (48 CFR 52.227-19) for civilian agency contracts or other comparable agency clauses.

17. Termination. Your right to use the Licensed Software continues until this EULA is terminated. You may terminate this EULA at any time by destroying all of Your copies of the Licensed Software. This EULA will automatically terminate if You fail to comply with the material terms of this EULA. Your right to use the Licensed Software may also be limited by another agreement to which You are subject, and such other agreement may cause an earlier termination of the rights granted under this EULA (for example, in the case the Licensed Software is provided under a separate agreement on a time limited or evaluation basis). Upon any termination, You agree to remove all Licensed Software from Your computers, destroy all copies of the Licensed Software, and, upon request from FrontRange Solutions, certify in writing Your compliance herewith.
18. Severability. If any of the terms, or portions thereof, of this EULA are invalid or unenforceable under any applicable statute or rule of law, the court shall reform the contract to include an enforceable term as close to the intent of the original term as possible; all other terms shall remain unchanged.
19. Whole Agreement. This EULA and any applicable FrontRange Solutions order form or maintenance and support agreement or like document constitutes the entire agreement between You and FrontRange Solutions relating to the license rights for the Licensed Software, and any additions to, or modifications of, this EULA shall be binding upon the parties only if the same shall be in writing and duly executed by You and by a duly authorized officer of FrontRange Solutions. THE TERMS AND CONDITIONS OF ANY CORRESPONDING PURCHASE ORDER OR OTHER ORDER CONFIRMATION FORM RELATING TO THE LICENSED SOFTWARE ARE ONLY BINDING ON FRONTRANGE SOLUTIONS IF SUCH TERMS AND CONDITIONS ARE AGREED TO IN WRITING IN ACCORDANCE WITH THE PRIOR SENTENCE AND IN A DOCUMENT OTHER THAN THE PURCHASE ORDER OR OTHER ORDER CONFIRMATION FORM.
20. Waiver. The waiver or failure of either party to exercise in any respect any right provided for in this EULA shall not be deemed a waiver of any further or future right under this EULA.
21. Assignability. This EULA shall inure to the benefit of, and is freely assignable to, FrontRange Solutions' successors and assignees of rights in the Licensed Software.
22. Resellers. If Licensee acquired the Licensed Software through a Reseller, Licensee acknowledges that (i) payment and delivery terms for the Licensed Software must be established separately and independently between the Licensee and the Reseller; (ii) this EULA constitutes the entire agreement between the Licensee and FrontRange Solutions regarding the license rights for the Licensed Software as described above and is controlling; (iii) the terms and conditions of any purchase order or any other agreement between the Licensee and the Reseller are not binding on FrontRange Solutions; (iv) the Reseller is not FrontRange Solutions' agent and is not authorized to alter, amend or modify the terms of this EULA or to otherwise grant any license or other rights relating in any way to the Licensed Software; and (v) Licensee's nonpayment of any amount due to a Reseller or any other relevant third party relating to its licensed rights under this EULA shall constitute a basis for FrontRange Solutions' termination of this EULA. Licensee further acknowledges that FrontRange Solutions makes no representation or warranty with regard to any services provided by any Reseller, or any actions or failures to act by any Reseller.

If Reseller received the Licensed Software as Not-For-Resale (or 'NFR') software in connection with a FrontRange Solutions reseller or other channel program, then this Licensed Software may only be used by Reseller, Reseller's right to use the Licensed Software shall be subject to the terms of such program and applicable reseller agreement, and will terminate upon Reseller's termination from such program or such earlier time as set forth in applicable reseller agreement.

23.Contact. All questions concerning this EULA shall be directed to:

FrontRange Solutions USA Inc.

4120 Dublin Blvd., Suite 200

Dublin, CA 94568

Attention: General Counsel

Phone: 925.404.1800

Facsimile: 719.799.1042

Email: legal@frontrange.com

24.Payments; Additional Licenses. Except where the Licensed Software is acquired through a Reseller (described above), the licenses granted herein are subject to and Licensee agrees to make payments to FrontRange no later than thirty (30) days from invoice, unless otherwise agreed to in writing by FrontRange. If You wish to expand the number of the seats, users, modules, technology foundation and/or any other FrontRange Solutions product, You may be able to license such items from FrontRange Solutions or a Reseller. You agree that the license of such additional items shall be under the same terms and conditions as contained in this EULA. You agree that the parties do not have to execute (whether electronically, by paper or other written form) another copy of this EULA or any other license agreement, or that the electronic signature process may be bypassed, with respect to any additional items licensed from FrontRange Solutions.

Introduction

Welcome to GoldMine

GoldMine provides your organization with a powerful, comprehensive, integrated, automated solution to managing customer relationships. It offers effective tools to develop contacts, conduct activities, and track progress. With GoldMine's synchronization features, users working remotely can stay current with the main company database.

What's New in GoldMine 7.0

The new features and enhancements available in GoldMine 7.0 support a variety of business processes while improving efficiency and usability and automating administration.

- **Pluggable Active X and HTML Containers:** Development tool allowing programmers to more tightly integrate their applications with GoldMine (similar to current SoftPhone integration).
- **GM+Browser:** Similar to GM+View, but provides floating window with multi-tab capability.
- **Contact Search Center Enhancements:** Enhanced to simplify performing an action on a Contact; includes new buttons for immediate functionality from the interface.
- **Microsoft Reporting Services Integration (Corporate Edition users):** Allows users to view and schedule reports from within GoldMine.
- **Changes to databases and database engines:** Support for dBASE has been replaced by support for Firebird 1.5 database, an open source SQL solution. Support for BDE has been replaced by ADO (ActiveX Data Objects).
- **Database Connections Manager:** Creates and maintains aliases used to connect to databases.
- **Changes to Databases Wizard:** Changes to workflow using this wizard.
- **Licensing model:** Reflects the current paradigm for licensing.

Find feature details in the GoldMine online Help.

About this Guide

The *GoldMine Installation Guide* describes the basic components and steps for installing GoldMine on your server, client workstations, and undocked computers.

The appendixes help you integrate GoldMine smoothly with your other technology tools.

Please see the online Help for additional information.

Audience and Expertise

The information in this manual is written for GoldMine users and system administrators performing installations. It describes the system requirements, step-by-step installation instructions, and tips for server setup, workstation setup, and undocked user installations.

This material assumes the user has an understanding of the Microsoft Windows operating system.

Document Conventions

Example	Description
File>>Print	Menu bar commands (in this example, select File on the menu bar, then select Print in the drop-down menu)
The Select a Data Source dialog box appears.	Dialog boxes and menu items in bold

Offices are also located in Colorado, United Kingdom, Germany, South Africa, Australia, Singapore and China. For international locale information, refer to the Global Sites area of the FrontRange Solutions Web site.

System Requirements

Overview

Before installing GoldMine on a network server, client workstation, or an undocked/single-user computer, ensure your system meets the system requirements for the environment.

Note: If certain requirements have not been met (for example, required programs have not been installed), the installer issues a message noting the “missing prerequisites” and advises you exit the installation, install those items, reboot, and then install GoldMine.

Level of Windows Security

Members of the Power Users group can create user accounts, but can modify and delete only those accounts they create. They can create local groups and remove users from those local groups and can also remove users from the Power Users, Users, and Guests groups.

Power Users group members cannot modify the Administrators or Backup Operators groups, nor can they take ownership of files, back up or restore directories, load or unload device drivers, or manage the security and auditing logs.

CAUTION: If you are running Windows XP, Windows 2000 Professional, Windows 2000 Server, or Windows 2003 Server, you must be logged on as a Power User or local administrator or be part of a Power User or administrator group.

Consult Microsoft Windows online help for further information.

Environments

Pay particular attention to the system requirements that apply to your environment and license type.

GoldMine can be installed and run in various environments. For example, you can install GoldMine on a Server, or select a regular computer to host a server installation. Environment is influenced by database size and capabilities, performance considerations, number of shared/undocked users, and so on.

GoldMine **Corporate Edition** uses either the Microsoft SQL Server or Firebird database.

Host Requirements

Requirements are listed for the following:

- Server
- Shared Workstation
- Undocked/Single-user

Note: If using GoldMine with Microsoft SQL Server, use **Recommended** instead of **Minimum** requirements.

Server Requirements

Network Operating Systems

FrontRange Solutions supports these network operating systems:

- Microsoft Windows 2000 Server/Advanced Server.
- Microsoft Windows 2003 Server.
- Microsoft Small Business Server 2000 (Service Pack 4)

Notes:

- Microsoft Windows XP is supported but not recommended as a server. See support.frontrange.com.
 - FrontRange Solutions does not provide assistance for the installation and setup of Microsoft Small Business Server (SBS). If you are using SBS, it must be installed and working prior to installing GoldMine. Ensure that SBS service packs are current and applied.
-

Network Protocols

- TCP/IP (recommended)
- IPX/SPX
- NetBEUI

Server System Requirements

- Microsoft Windows 2000 Server/Advanced Server; Windows 2003 Server.
- Microsoft Data Access Components (MDAC) 2.6 or higher. MDAC is installed automatically with SQL Server, but must be manually installed if you are using a Firebird database.
- SCSI or Ultra DMA Enhanced IDE hard drives: RAID Array or mirrored (recommended).
- 100 MBps network connection (recommended).

Server Memory Requirements

Database Size	Minimum RAM Allocation
50 MB	128 MB
100 MB	256 MB
500 MB < 2 GB	512 MB
2–5 GB	1 GB
5–12 GB	2 GB
12+ GB	3 GB

Server CPU Requirements

Users	Minimum	Recommended
1–10	Pentium III 300-MHz	Pentium III 700-MHz
11–50	Pentium III 300-MHz dual processor	Pentium III 700-MHz dual processor or P4 1-GHz or 2-GHz
51–149	Pentium III 700-MHz dual processor	Pentium III 700-MHz quad processor or P4 1-GHz or 2-GHz

Performance Considerations

Server RAM and CPU requirements vary depending upon your database and these factors:

- Number of items in the database:
 - Contact Records (1 KB each)
 - Detail Records (2 KB each)
 - History Records (1 KB each)
 - User-defined fields
- Number of simultaneous users on the network.
- Database size.

Shared Workstation Requirements

These recommendations are for client workstations connected to the GoldMine server.

System	Minimum	Recommended for Standard Edition	Recommended for Corporate Edition
CPU	Pentium 200 MHz	Pentium I/III +	Pentium III/4
HDD	65 MB	165 MB +	300 MB
RAM	64 MB	128 MB +	256 MB

Operating Systems

FrontRange Solutions supports these operating systems:

- Microsoft Windows 2000 Professional/Server/Advanced Server.
- Microsoft Windows XP (Home/Professional).
- Microsoft Windows 2003 Server.

Note: FrontRange Solutions neither supports nor recommends using Windows emulators on Macintosh, Linux, or other operating systems.

Workstation System Requirements

Microsoft Data Access Components (MDAC) 2.6 or higher must be installed on the server and any shared or undocked workstation to enable database functionality. MDAC is installed automatically with SQL Server, but must be manually installed if you are using a Firebird database.

Undocked/Single-user Requirements

These recommendations are made for computers working disconnected from a GoldMine server.

CAUTION: If you are running Windows XP, Windows 2000 Professional, or Windows 2000 Server, you must have Admin or Power User rights in order to install GoldMine.

Operating Systems

FrontRange Solutions supports:

- Microsoft Windows 2000 Professional/Server/Advanced Server.
- Microsoft Windows XP (Home/Professional).
- Microsoft Windows 2003 Server.

Note: FrontRange Solutions Technical Support neither supports nor recommends using Windows emulators on Macintosh, Linux, or other operating systems.

Undocked System Requirements

Microsoft Data Access Components (MDAC) 2.6 or higher must be installed on the server and any shared or undocked workstation to enable database functionality. MDAC is installed automatically with SQL Server, but must be manually installed if you are using a Firebird database.

Performance Considerations

Your RAM and CPU requirements vary depending upon your database and these factors:

- Number of items in the database:
 - Contact Records (1K each)
 - Detail Records (2K each)
 - History Records (1K each)
 - User-defined field
- Number of simultaneous users on the network
- Database size

Software Requirements

Use Microsoft Internet Explorer 6.0 with GoldMine.

Ancillary Requirements

- **Microsoft SQL Server 2000** (SP3 recommended), **Microsoft SQL Server 2005** (SP1 required), or **Microsoft SQL Server 7.0** (SP4) must be installed and configured if you are using a SQL database.
- **Microsoft SQL Server 2000/2005 Reporting Services** must be installed and configured to use the Scheduled Reports feature.
- **Microsoft SQL Server 2000/2005 Client Tools** must be installed prior to initiating the GoldMine installation process if you intend to perform a Server installation to share your database.
- **Microsoft .NET Framework 1.1** must be installed and configured to use the Scheduled Reports feature.
- **Microsoft Visual Studio 2003 .NET** must be installed and configured to create reports for the Scheduled Reports feature. End users do not require this application.
- When you select a Firebird database during installation of GoldMine 7.0, a working copy of **Firebird 1.5** is installed. To change the default password, Firebird comes with an ISQL command line tool. See the *GoldMine online Help* for instructions.

There are also free tools to help you administrate Firebird, such as those available from **FlameRobin**, **FeniSQL**, and **IBExpert**. The **Firebird 1.5 Quick Start Guide** provides essential details and is available online, including from www.firebird.sourceforge.net. To take advantage of other Firebird features, see www.ibphoenix.com and www.firebirdsql.org for additional information.

Note: FrontRange Solutions does not support these third-party tools.

GoldSync Requirements

GoldSync automated the synchronization of data between a host GoldMine system and multiple remote GoldMine systems.

GoldSync supports multi-user/multi-site environments and includes support for many simultaneous connections. As the amount of data and number of users increase, GoldSync scales as needed for the work load demand.

For details on GoldSync implementation and functionality, see the GoldSync section of GoldMine online Help.

GoldSync System Requirements

Item	Minimum	Recommended
Operating System	Windows 2000 Server.	Microsoft Windows 2000 Server – Advanced Server.
Disk Subsystem	IDE drives may be used in less demanding scenarios.	RAID Array or mirrored (for larger databases or heavy synchronization load)
RAM Allocation	128 MB (for < 2 GB database with 10 concurrent sync sessions)	256 MB (for < 2 GB database with 10 concurrent sync sessions)
Central Processing Unit (CPU)	Single processor adequate Pentium II 350 MHz for 10 sites or fewer, simultaneous processing	Single processor adequate Pentium III 450 MHz, Xeon
Network Connection	10 Base-T adequate TCP/IP	100 Base-TX TCP/IP
Client Utilities	MS-SQL Client Utilities 7.x or 2000 (if using MS-SQL 7.x, 2000 or 2005 as database application)	MS-SQL Client Utilities 7.x or 2000 (if using MS-SQL 7.x, 2000 or 2005 as database application)

Installing Corporate Edition

Overview

GoldMine provides various types of installations, whether from NetUpdate or CD, a new or upgrade, on a server or workstation, in network or remote. Please review the planning items and considerations, determine the type of installation you are running, and use the associated checklist to ensure a successful installation.

Planning for Installation

When planning a GoldMine installation consider:

1. **Who will be the designated GoldMine administrator?** The GoldMine administrator should have access to network and office resources and be able to address the business-related implementation issues regarding configuration and customization.
2. **Do you have the proper license and registration information for the version of GoldMine you are installing?** For detailed information on licensing, see Chapter 3, "Licensing and Registration."

GoldMine Solutions Partners are GoldMine Certified in installation and setup. To locate a partner in your area, go to **www.frontrange.com** and use the Partner Locator.

3. **Are you going to import data?** Verify you can import the source data into GoldMine.
4. **Does the system administrator have full administrative rights?** To install GoldMine on a network, the GoldMine administrator must have full administrative rights on the network.
5. **Are your service packs compatible and current?** Check the version and service pack number for your Microsoft Windows operating system. Verify no issues exist with your current service pack on the Web site at **support.frontrange.com**.
6. **Have you reviewed the network structure?**
 - Are there multiple domains? Do the users have the correct rights on the GoldMine domain to access GoldMine?
 - Is the server outside the regular network? There may be connectivity issues the network administrator needs to address.
7. **What type of database are you using?** Decide whether to use a Microsoft SQL Server database or a Firebird database. Ask your Sales representative for information.

Upgrade Considerations

Use this upgrade process with GoldMine 5.0 or higher. If you are upgrading a prior version, you must upgrade to 5.x before upgrading to 7.0. If you are running 4.0 or earlier, please contact Customer Care at 800.776.7889 (Option 3).

CAUTION: Back up your existing GoldMine database and system before beginning the upgrade.

- In addition to the 65 MB of disk space required for installation, ensure you have at least 2½ times the size of your largest table in additional free space on your hard disk.

Example: If your largest table is Conthist, which has an 85 MB .dbf and a 15 MB .dbt for 100 MB total, you should have 250 MB free disk space before continuing (2½ x 100 MB).

- A database conversion may be required when upgrading from earlier versions of GoldMine. This conversion occurs automatically when GoldMine is installed into the path of the existing gmw5.exe or gmw6.exe.

CAUTION: If you are upgrading a **large Microsoft SQL Server database** (5GB of data or more), see **Appendix E** before proceeding with the upgrade. Certain computers (limited computing power) require manual steps to upgrade the database successfully.

- Undocked users should be on the same version of GoldMine as the site with which they sync. If you are upgrading the server but are not upgrading undocked computers until a later time, disable their sync sites in the GoldSync Administration Center on the server. Reactivate their site when the undocked computer is upgraded and is running the same version of GoldMine as the server.
- If you have a previous version of the GoldMine Link to Word or GoldMine Plus Microsoft Office, uninstall this version prior to upgrading. The upgrade installs the new GoldMine Plus Microsoft Office installer file that is compatible with GoldMine 7.0.
- If you have a previous version of GoldMine Integration Services for Microsoft Outlook, uninstall this version prior to upgrading.

Installing GoldMine on Windows XP

Windows XP is not a recommended platform for a server.

- Some users may encounter issues with the auto-run installation.
- For users of GoldMine 5.0-5.7 who back up GoldMine by copying the GoldMine folder at C:\Program Files, this means they are not copying their data files and must browse to Documents and Settings\All Users\Application Data\GoldMine to find their data folders.
- Customers using a Windows XP system as a server may have problems with the client workstations accessing the data on the network due to the “split.” Users may encounter license errors when performing NetUpdates.
- The full version of Microsoft SQL Server 2000 requires Windows 2000 Server or Windows 2003 Server operating system.

Changes to System Files

Located in the GoldMine folder, these store user and licensing information. System files typically take a BIN or XML format, whether you use Firebird or SQL as your database system.

- **DataDict.xml:** Includes database and field definitions and is required for synchronization. The tables include .dbf and .mdx.
- **Flags.bin:** Controls the number of users logged on to GoldMine.
- **License.bin:** The system's license control table that stores License Manager information and validates incoming sync connections.
- **Users:** Formerly **Users.dbf**, this is now a table. It is rehosted to the SQL Server starting with version 7.0. It collects the user's information such as user login and permission information.
- **User_info.bin:** Stores SQL login information.
- **GM.ini:** Controls how GoldMine launches.
- **DBAlias.ini:** Stores the database username and password.
- **GoldMine.fdb:** Default database name when Firebird is selected during installation.
- **Firebird ODBC driver:** Made up of the **lscDbc.dll**, **OdbcJdbc.dll**, and **OdbcJdbcSetup.dll** files.

Installation Checklists

If you are:	Then run:
Shared Server: A company that must support multiple GoldMine users using a shared copy of GoldMine. Users can then connect to the server copy from their local client workstations using shortcuts installed by running a Workstation installation.	Server Setup
Shared Workstation: An individual in an organization with a multi-user environment who must connect to a shared copy of GoldMine. Installs shortcuts to the client workstation so the end user can connect to the server copy of GoldMine from his or her individual computer.	Workstation Setup
Undocked: An individual who often works remotely on a computer with an Undocked sublicense, who synchronizes with a GoldMine server to update information. Install a full copy of GoldMine with a Firebird database on a computer working disconnected from a network.	Undocked Setup (with U-License)

Server Installation Checklist

- ☐ **Back up your database and folders:** (*Upgrading customers only*) If you are upgrading, back up your GoldMine database. We also recommend backing up your GoldMine folder and any other folders containing files linked to GoldMine before beginning any installation. This prevents the loss of valuable contact information.
- ☐ **Confirm all GoldMine users are logged out of the system:** (*Upgrading customers only*).
- ☐ **Uninstall linked and integrated programs:** (upgrading customers only) Uninstall GoldMine Link for Word, GoldMine Plus Microsoft Office, GISME, GISMO.
- ☐ **Exit all running system programs and stop services:** Includes third-party utilities that integrate with GoldMine, other GoldMine add-on products (such as GoldSync), the Microsoft Office Shortcut bar. Stop all services that integrate with GoldMine.
- ☐ **Install ancillary programs:** Install necessary programs on the computer serving as the GoldMine server or on another computer on your network. See "Ancillary Requirements" on page 1-8.
- ☐ **Install GoldMine:** Install on the computer serving as your GoldMine server. Select the Server Setup installation and follow the directions in this manual.
- ☐ **License the server copy of GoldMine:** Licensing registers the shared server copy of GoldMine with the appropriate license. See Chapter 3, "Licensing and Registration."
- ☐ **Verify you can launch GoldMine:** Ensure the server installation is functioning properly before installing any workstations.
- ☐ **Share the GoldMine folder:** In order for the client workstations to connect to the shared copy of GoldMine, you must first share the folder in which GoldMine is installed. See "Sharing the GoldMine Folder on the Server" on page 2-25.

Shared Workstation Installation Checklist

- ☐ **Uninstall linked and integrated programs:** (*Upgrading customers only*) Uninstall GoldMine Link for Word, GoldMine Plus Microsoft Office, GISME, GISMO.
- ☐ **Exit all running system programs and stop services:** Includes third-party utilities that integrate with GoldMine, other GoldMine add-on products (such as GoldSync), the Microsoft Office Shortcut bar. Stop all services that integrate with GoldMine.
- ☐ **Create a mapped drive to the shared GoldMine folder:** See "Mapping a Drive on the Workstations" on page 2-26.
- ☐ **Install GoldMine on the Client Workstation:** See "Running a Workstation Installation" on page 2-25.
- ☐ **Verify you can launch GoldMine:** Ensure the workstation installation is functioning properly.

Undocked Computer Installation Checklist

- ☐ **Create an Undocked license:** (undocked license users only) See Chapter 3, "Licensing and Registration."
- ☐ **Uninstall linked and integrated programs:** (*Upgrading customers only*) Uninstall GoldMine Link for Word, GoldMine Plus Microsoft Office, GISME, GISMO.
- ☐ **Exit all running system programs and stop services:** Includes third-party utilities that integrate with GoldMine, other GoldMine add-on products (such as GoldSync), the Microsoft Office Shortcut bar. Stop all services that integrate with GoldMine.
- ☐ **Disconnect the laptop from the network:** Disconnect to ensure GoldMine configures the laptop to connect only with the database on the local computer and not with the network.
- ☐ **Install GoldMine to the undocked computer:** See "Running an Undocked Computer Installation" on page 2-31.
- ☐ **License GoldMine:** Use the appropriate U-license information. See Chapter 3, "Licensing and Registration."
- ☐ **Verify you can launch GoldMine:** Ensure the undocked installation is functioning properly.

Installing on a Server (SQL Database)

A shared Server Setup installs a full copy of GoldMine to a common location—usually a shared network drive. Workstation-based users can connect to the server copy from their local computers (after running a Shared Workstation installation).

IMPORTANT: The following steps are for a **New Install**. If you have had a previous version installed, remove the existing version, folders, and databases before proceeding. If upgrading, use the steps in "Upgrading a Server (SQL Database)" on page 2-22.

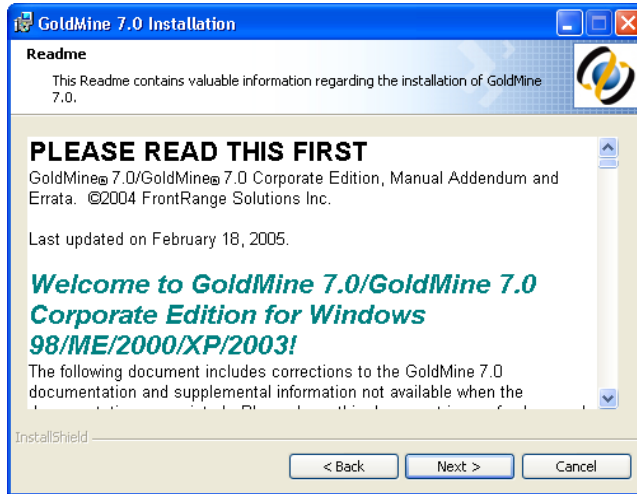

1. Log directly into the server as a local administrator.
2. The installation CD is set up to autorun when inserted into your CD-ROM drive or run the **gm7setup.exe** downloaded to your server installation of GoldMine during the Net-Update process.

The **Welcome to the GoldMine Installation Wizard** dialog box appears.

3. Click **Next**.

The **Readme** dialog box appears.

4. Click **Next**. The **License Agreement** dialog box appears.

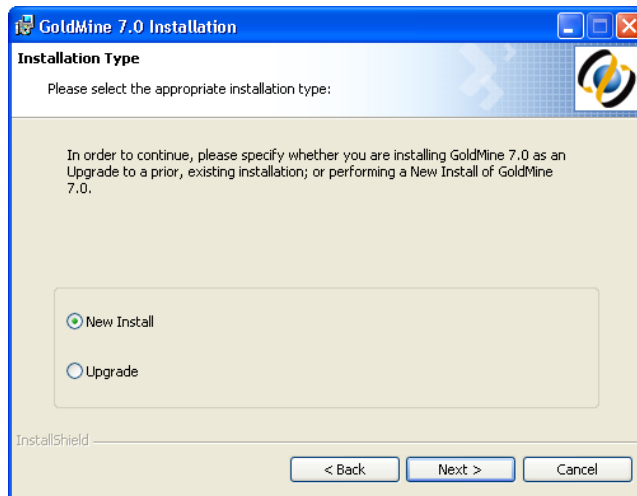

5. Review the licensing information carefully; if you agree to the terms, select **I accept the terms in the license agreement**.

Note: If you do not agree to the terms of the license agreement, select **I do not accept the terms in the license agreement**. Click **Cancel** to terminate the installation.

6. Accepting the terms of the agreement activates the subsequent check boxes. You must select both check boxes to continue with the installation.

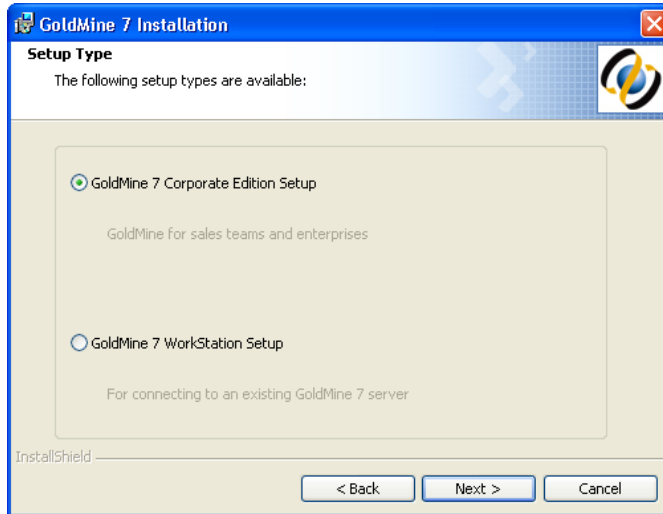

IMPORTANT: Select **I am an authorized agent and/or representative of the customer/end-user** and **I have read the terms and conditions stated above** to continue.

7. Click **Next**. The **Installation Type** dialog box appears.

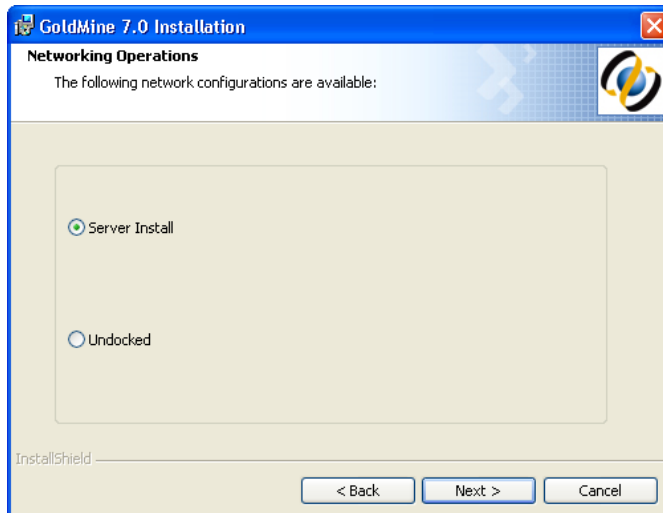

8. Select **New Install**.

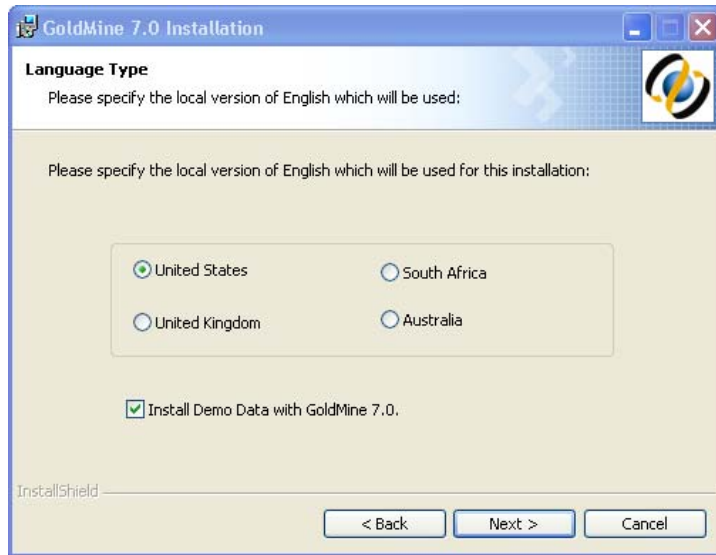

9. Click **Next**. The **Setup Type** dialog box appears.

10. Select **GoldMine 7.0 Corporate Edition Setup**.
11. Click **Next**. The **Networking Operations** dialog box appears.

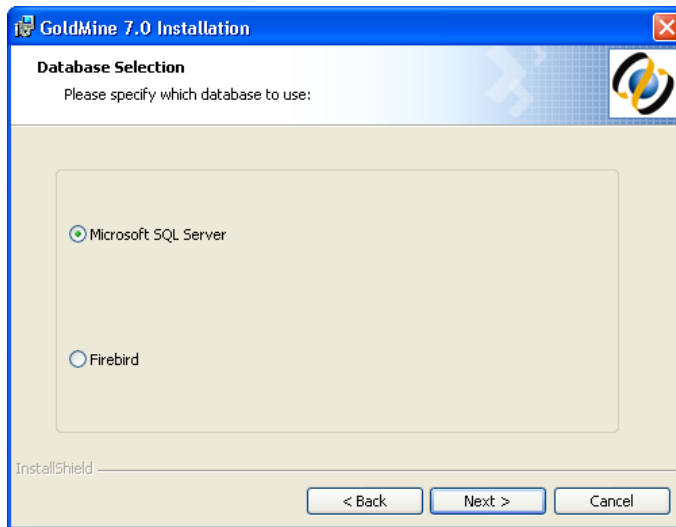

12. Select **Server Install**. The **Language Type** dialog box appears.

13. Select a language.
14. If you are installing new and wish to add the demonstration data to the database, select **Install Demo Data with GoldMine**.

Note: When upgrading, this dialog box does not appear.

15. Click **Next**. The **Database Selection** dialog box appears.

16. Select **Microsoft SQL Server**.

17. Click **Next**. The **GoldMine Target Location** dialog box appears.

18. To install GoldMine to a different location, click **Change**. The **Change Current Destination Folder** dialog box appears. Type a path or browse to the folder where you want GoldMine installed. To return to the **GoldMine Target Location** window, click **OK**.

IMPORTANT: Customers installing GoldMine for the first time must first create a GoldMine folder on the server. Remember, sharing may expose other applications, so do **not** install GoldMine as a root folder of the drive (for example, C:\GoldMine). Install to c:\apps\GoldMine (on Windows 2003 and Windows XP Professional) or C:\Program Files\GoldMine\ (Windows 2000) and install the server copy of GoldMine to this folder.

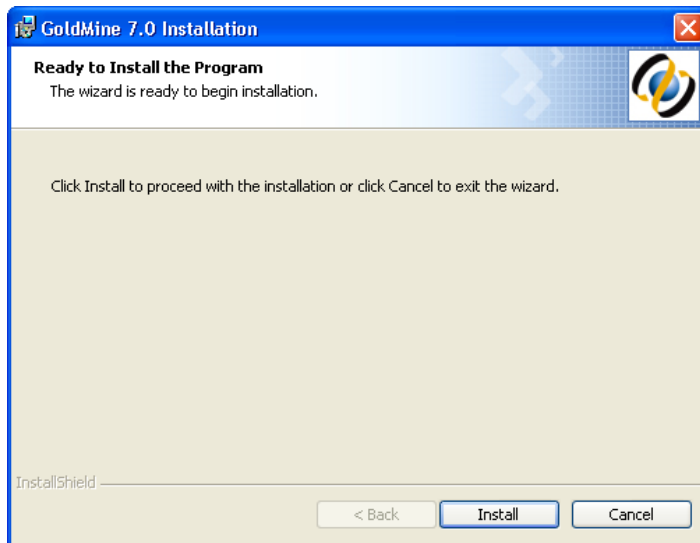

19. Click **Next**. The **MS SQL Administrator Login** dialog box appears.

- **MS SQL Server Name:** Type or select the name of the computer on your network where SQL Server is installed.
- **MS SQL Database Name:** GoldMine creates and installs the demo data in a SQL database called GoldMine. If you want your database to have a different name, type it in the text box.
- **MS SQL Administrative Username:** The default login in SQL is **sa**. If your SQL user name is different, your SQL administrator must provide the information.

- **MS SQL Administrative Password:** There is no default password in SQL. If your SQL password is different, your SQL administrator must provide the information.

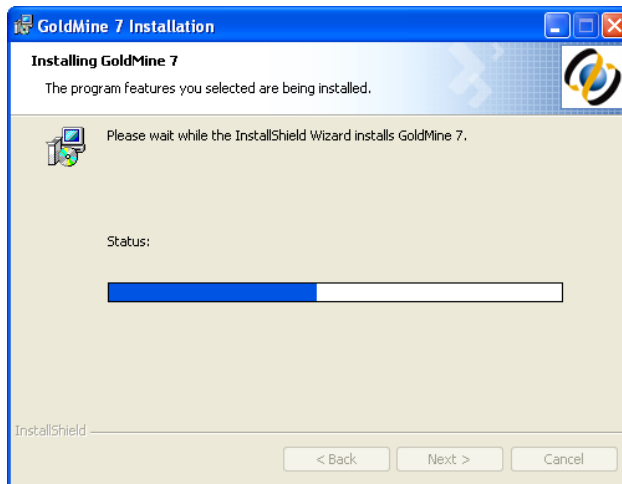

Note: If you click **Next** without typing a user name and password, the **Insufficient Input** dialog box appears. Click **Back**. If you type incorrect information and click **Next**, the **MS SQL Login Failed** dialog box appears. Review the troubleshooting tips, then click **Back**.

20. Click **Next**. The **Ready to Install the Program** dialog box appears.

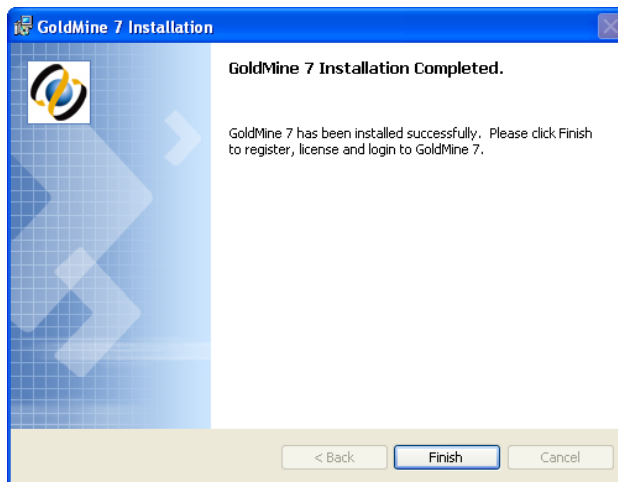

21. Click **Install** to begin installing GoldMine.

The **Installing GoldMine** dialog box appears.

When finished, the **Installation Completed** dialog box appears.

22. Click **Finish**.

IMPORTANT: The Welcome to GoldMine dialog box appears to begin the licensing process. See "Licensing Following Installation" on page 3-7.

Installing on a Server (Firebird Database)

When you select a Firebird database during installation of GoldMine 7.0, a working copy of Firebird 1.5 is installed.

This shared Server setup installs a full copy of GoldMine to a common location—usually a shared network drive. Workstation-based users can connect to the server copy from their local computers (after running a Shared Workstation installation).

IMPORTANT: The following steps are for a **New Install**. If you have had a previous version installed, remove the existing version, folders, and databases before proceeding. If upgrading, use the steps in "Upgrading a Server (SQL Database)" on page 2-22.

1. Log directly into the server as a local administrator.
2. The installation CD is set up to autorun when inserted into your CD-ROM drive or run the **gm7setup.exe** downloaded to your server installation of GoldMine during the Net-Update process. The **Welcome to the GoldMine Installation Wizard** dialog box appears.
3. Click **Next**. The **Readme** dialog box appears.
4. Click **Next**. The **License Agreement** dialog box appears.
5. Review the licensing information carefully; if you agree to the terms, select **I accept the terms in the license agreement**.

Note: If you do not agree to the terms of the license agreement, select **I do not accept the terms in the license agreement**. Click **Cancel** to terminate the installation.

6. Accepting the terms of the agreement activates the subsequent check boxes. You must select both check boxes to continue with the installation.

IMPORTANT: Select **I am an authorized agent and/or representative of the customer/end-user** and **I have read the terms and conditions stated above** to continue.

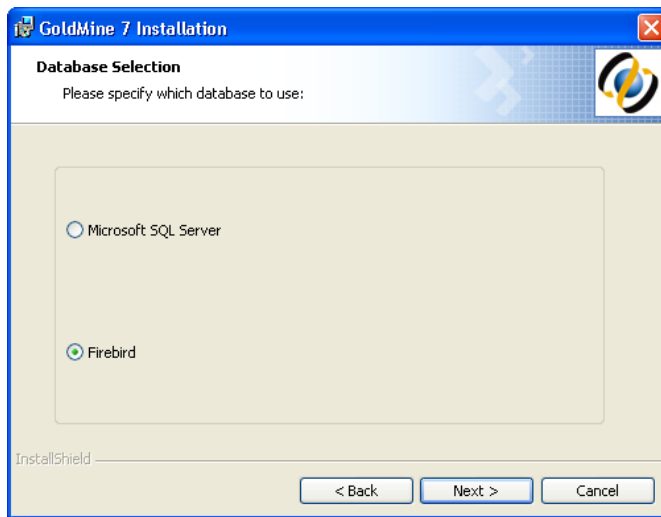

7. Click **Next**. The **Installation Type** dialog box appears.
8. Select **New Install**.

9. Click **Next**. The **Setup Type** dialog box appears.
10. Select **GoldMine 7.0 Corporate Edition Setup**.
11. Click **Next**. The **Networking Operations** dialog box appears.
12. Select **Server Install**. The **Language Type** dialog box appears.
13. Select a language.
14. If you are installing new and wish to add the demonstration data to the database, select **Install Demo Data with GoldMine**.

Note: When upgrading, this dialog box does not appear.

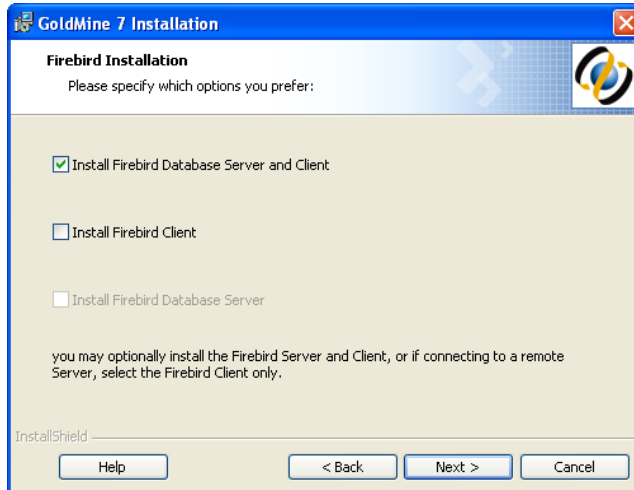

15. Click **Next**.

The **Database Selection** dialog box appears.

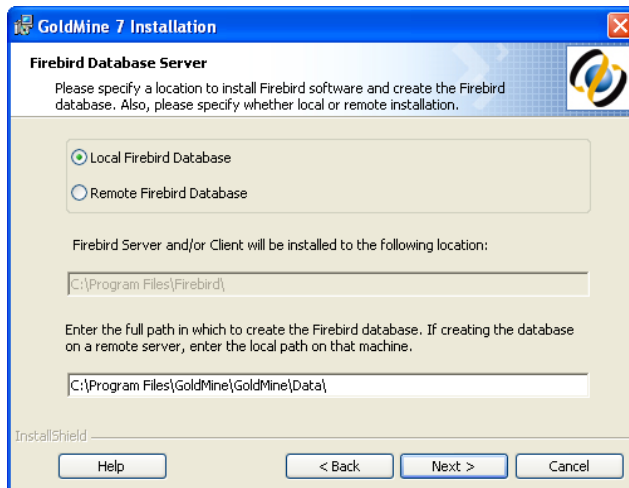

16. Select **Firebird**.
17. Click **Next**. The **GoldMine Target Location** dialog box appears.
18. To install GoldMine to a different location, click **Change**. The **Change Current Destination Folder** dialog box appears. Type a path or browse to the folder where you want GoldMine installed. To return to the **GoldMine Target Location** window, click **OK**.

19. Click **Next**. The **Firebird Installation** dialog box appears.

Note: This dialog will not appear if either the Firebird Server or Client have already been installed.

20. Select **Install Firebird Database Server and Client**.
21. Click **Next**. The **Firebird Database Server** dialog box appears.

22. Select **Local Firebird Database**.
23. The **Firebird Server/Client** are installed to the drive where the OS is installed (in Program Files\Firebird\Firebird_1_5 folder).
24. The **Firebird database** is installed locally on the Firebird server to **Program Files\GoldMine\GoldMine\Data**. Accept the default or type an valid alternative path (such as <Firebird server> C:\Apps\GoldMine).
25. Click **Next**. The **Firebird Administrator** dialog box appears.

GoldMine 7 Installation

Firebird Administrator

Please specify the Firebird Administrative information, then click "Next". Click the "Help" button for more information.

Please enter the required information for the Firebird Server. Note that password cannot exceed 9 characters in length.

Firebird Server Name:

Firebird Database Name:

Firebird Administrator Username:

Firebird Administrator Password:

InstallShield

26. Accept the default or specify the appropriate information:
 - **Firebird Server Name:** Name of remote server.
 - **Firebird Database Name:** Name of new Firebird database (with FDB extension).
 - **Firebird Administrator Username:** Security user name.
 - **Firebird Administrator Password:** Security password.

Note: Change the user name and password after installation is complete. See online Help for instructions.

27. Click **Next**. The **Firebird GoldMine Database Administrator** dialog box appears.

28. Accept the default or specify new database login for owner:
- **Firebird Database User:** The default user **GMSYSDBA** is created.
 - **Firebird Database User Password:** Options are a) accept the default user and type a new password (write it down during setup), or b) type an existing user name. If you specify an existing user as owner, you must type that user's corresponding password before the installation proceeds (if authentication fails, the message "Unable to connect...." appears). Field has 8-character recognition limit.
 - **Confirm Password:** Retype password to confirm.
29. Click **Next**. The **Ready to Install the Program** dialog box appears.
30. Click **Install**. The **Installing GoldMine** dialog box appears. When finished, the **Installation Completed** dialog box appears.
31. Click **Finish**.

Note: The Welcome to GoldMine dialog box appears to begin the licensing process. See "Licensing Following Installation" on page 3-7.

Upgrading a Server (SQL Database)

Be sure to review the "Upgrade Considerations" on page 2-3.

CAUTION: If you are upgrading from a previous version of GoldMine, back up your existing GoldMine database and system before beginning the upgrade.

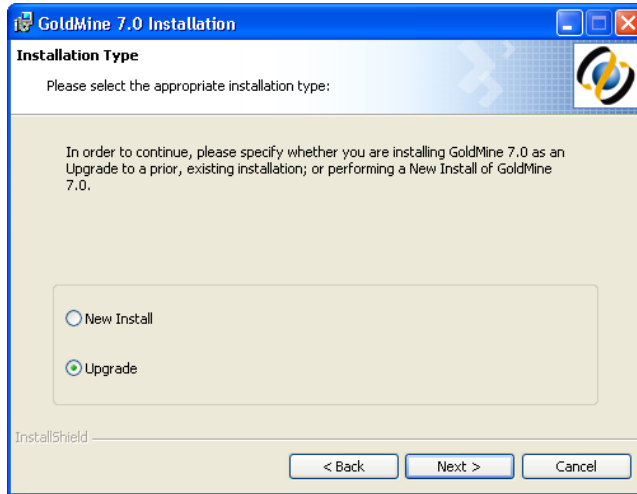

1. Log directly into the server as a local administrator.
2. The installation CD is set up to autorun when inserted into your CD-ROM drive or run the **gm7setup.exe** downloaded to your server installation of GoldMine during the Net-Update process. The **Welcome to the GoldMine Installation Wizard** dialog box appears.
3. Click **Next**. The **Readme** dialog box appears.
4. Click **Next**. The **License Agreement** dialog box appears.
5. Review the licensing information carefully; if you agree to the terms, select **I accept the terms in the license agreement**.

Note: If you do not agree to the terms of the license agreement, select **I do not accept the terms in the license agreement**. Click **Cancel** to terminate the installation.

6. Accepting the terms of the agreement activates the subsequent check boxes. You must select both check boxes to continue with the installation.

IMPORTANT: Select **I am an authorized agent and/or representative of the customer/end-user** and **I have read the terms and conditions stated above** to continue.

7. Click **Next**. The **Installation Type** dialog box appears.

8. Select **Upgrade**.
9. Click **Next**. The **Setup Type** dialog box appears.
10. Select **GoldMine 7.0 Corporate Edition Setup**.
11. Click **Next**. The **Networking Operations** dialog box appears.
12. Select **Server Install**. The **Database Selection** dialog box appears.
13. Select **Microsoft SQL Server**.
14. Click **Next**. The **GoldMine Target Location** dialog box appears.

Note: When upgrading, click **Change** to locate your existing GoldMine installation. The **Change Current Destination Folder** dialog box appears. Type a path or browse to the folder where you want GoldMine installed. To return to the **GoldMine Target Location** dialog box, click **OK**.

15. To install GoldMine to a different location, click **Change**. The **Change Current Destination Folder** dialog box appears. Type a path or browse to the folder where you want GoldMine installed. To return to the **GoldMine Target Location** window, click **OK**.

16. Click **Next**. The **MS SQL Administrator Login** dialog box appears.

17. Complete these SQL Server text boxes:

- **MS SQL Server Name:** Type or select the name of the computer on your network where SQL Server is installed.
- **MS SQL Database Name:** GoldMine creates and installs the demo data in a SQL database called GoldMine. If you want your database to have a different name, type it in the text box.
- **MS SQL Administrative Username:** The default login in SQL is **sa**. If your SQL user name is different, your SQL administrator must provide the information.
- **MS SQL Administrative Password:** There is no default password in SQL. If your SQL password is different, your SQL administrator must provide the information.

Note: If you click **Next** without typing a username and password, the **Insufficient Input** dialog box appears. Click **Back**. If you have typed incorrect information and click **Next**, the **MS SQL Login Failed** dialog box appears. Review the troubleshooting tips then click **Back**.

18. Click **Next**. The **Ready to Install the Program** dialog box appears.

19. Click **Install** to begin installing GoldMine. The **Installing GoldMine** dialog box appears. When finished, the **Installation Completed** dialog box appears.

20. Click **Finish**.

IMPORTANT: The Welcome to GoldMine dialog box appears to begin the licensing process (see "Licensing Following Installation" on page 3-7). Because of the new licensing schema, the GoldMine installer will not upgrade your license.

Note: On most systems, the **Optimize OrgChart Wizard** dialog box will appear once the upgrade procedure is complete (see **GoldMine Online Help** for more information about Optimizing OrgCharts). The wizard will not appear if the index that it creates already exists in the upgraded system's program files.

Running a Workstation Installation

A shared workstation setup installs shortcuts on the workstation enabling workstation users to connect to the shared server copy of GoldMine from their individual computers. Select either:

- **Option 1:** Share the GoldMine folder on the server, then map the same drive on each workstation to the shared GoldMine folder on the server (not recommended if using SoftPhone, Management Intelligence, or a Firebird database).
- **Option 2:** Run the workstation installation. This option makes more GoldMine capabilities available to the workstation and is **required** when using Firebird.

Sharing the GoldMine Folder on the Server

To enable **Option 1**, after installing the GoldMine Server setup, share the GoldMine root directory so the workstations function properly. All GoldMine users must have rights to read, write, modify, and delete files for GoldMine to function on the workstations.

IMPORTANT: Sharing may expose other applications. Do **not** install GoldMine as a root folder of the drive, rather, install to c:\apps\GoldMine (on Windows 2003 and Windows XP Professional) or C:\Program Files\GoldMine\ (Windows 2000) and install the server copy of GoldMine to this folder.

1. Navigate to and select the GoldMine folder on the server (for example, **C:\Program Files\GoldMine\GoldMine**).
2. Right-click for a menu and select **Sharing and Security**. The **GoldMine Properties** dialog box appears.
3. Click the **Sharing** tab.
4. Select the **Share this folder** option.
5. Name the shared folder **GoldMine**.
6. Set the **User Limit** to **Maximum Allowed**.
7. Click **Permissions**. The **Permissions for GoldMine** dialog box appears.
8. From the **Group or User Names** list, select the workstation's user.
9. In the **Permissions for** area, select the **Full Control** check box.

10. Click **OK**. The **GoldMine Properties** dialog box reappears.
11. Click **OK**.

Note: If you are using a different Windows operating system, your steps may vary.

Mapping a Drive on the Workstations

To complete **Option 1**, we recommend all workstations accessing the shared GoldMine folder be mapped to the same network drive letter (for example, **G:**) to facilitate GoldMine administration and operations related to linked documents and synchronization.

1. On the workstation computer, start **Windows Explorer** and select **Tools>>Map Network Drive**.
2. From the **Drive** list box, select the designated drive letter for mapping to the GoldMine folder on the server.
3. From the **Folder** list box, Browse to the shared GoldMine folder, for example, **\\GoldMine Server\ GoldMine**.
4. Select the **Reconnect at Logon** check box.
5. Click **OK**.
6. Click **Finish**.
7. Repeat this procedure on each client workstation computer.

Installing on a Workstation

To enable **Option 2**, the workstation setup installs as a process that creates a shortcut to the server copy of GoldMine. The administrator must copy the setup executable to a location available to workstations.

1. From the workstation computer, locate the **gm7setup.exe** file. Double-click to run the executable. The **Welcome to the GoldMine Installation Wizard** dialog box appears.
2. Click **Next**. The **Readme** dialog box appears.
3. Click **Next**. The **License Agreement** dialog box appears.
4. Review the licensing information carefully; if you agree to the terms, select **I accept the terms in the license agreement**.

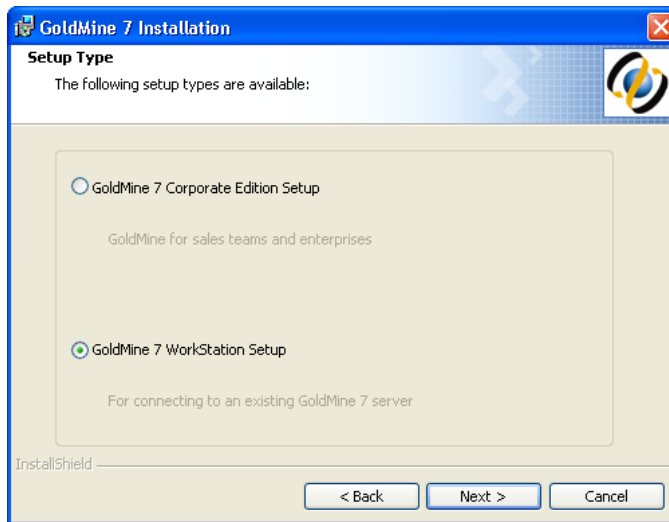

Note: If you do not agree to the terms of the license agreement, select **I do not accept the terms in the license agreement**. Click **Cancel** to terminate the installation.

5. Accepting the terms of the agreement activates the subsequent check boxes. You must select both check boxes to continue with the installation.

IMPORTANT: Select **I am an authorized agent and/or representative of the customer/end-user** and **I have read the terms and conditions stated above** to continue.

6. Click **Next**. The **Installation Type** dialog box appears.
7. Select one installation type:
 - **New Install:** If GoldMine was never installed.
 - **Upgrade:** If you are upgrading from a previous version of GoldMine.

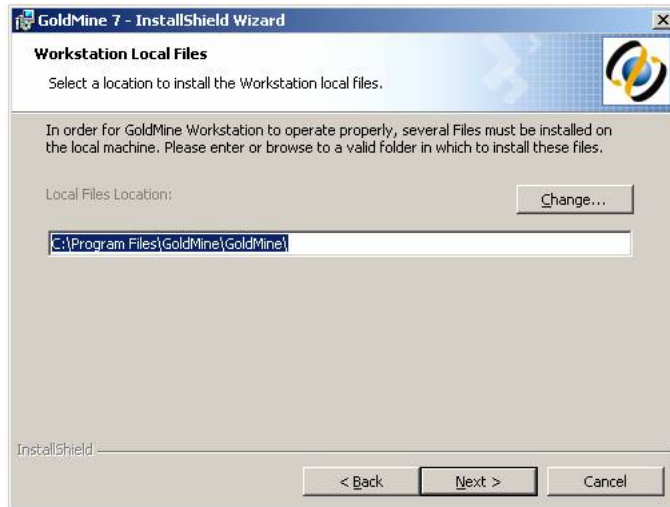

8. Click **Next**. The **Setup Type** dialog box appears.

9. If you have installed a GoldMine Server Setup on a host computer, select **GoldMine Workstation Setup**.
10. Click **Next**. The **GoldMine Server Location** dialog box appears.

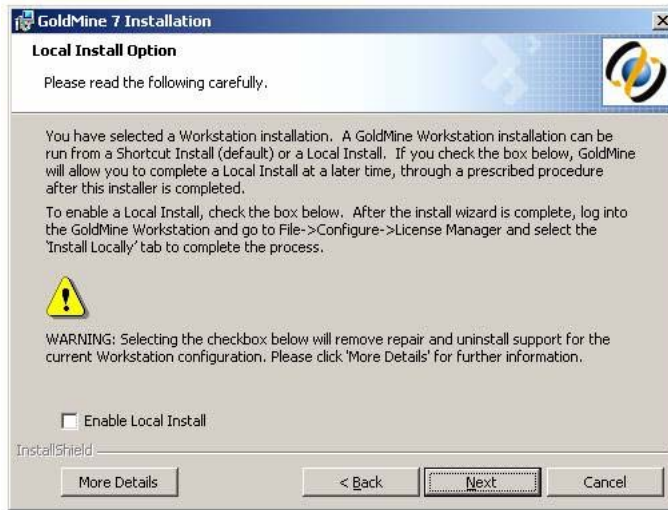

11. In the **Network Location** text box, click **Change** and browse the network for your shared GoldMine server.
12. The **Change Current Destination Folder** dialog box appears. Type the UNC or network path for the shared GoldMine server installation on your network. To return to the **GoldMine Server Location** dialog box, click **OK**.
13. Click **Next**. The **Workstation Local Files** dialog box appears.

In the **Local Files Location** text box, click **Change** and browse your hard drive for your preferred folder. To return to the **Workstation Local Files** dialog box, click **OK**.

14. Click **Next**. The **Local Install Option** dialog box appears.

A normal workstation installation does not install the GoldMine executable file on your local computer. Any network failure will terminate the connection of your local computer to the executable file on the server, and GoldMine will be silently terminated. This may result in system unreliability and the loss of data.

The Local Install option greatly improves system performance for workstation installations by adding more executable and .dll and files to your local computer. We highly recommend that you select the Local Install option for workstation installations.

To complete your local installation, select **File>>Configure>>License Manager** and click the **Install Locally** tab after you have completed the installation wizard.

15. Click **Next**. The **Ready to Install** dialog box appears.
16. Click **Install**. The network shortcuts are installed on your workstation computer.
17. When finished, the **Installation Completed** dialog box appears.
- Repeat steps 1-16 for each workstation accessing GoldMine.

Running an Undocked Computer Installation

An Undocked setup installs a full copy of GoldMine with a Firebird database on a computer working disconnected from a network but synchronizing with the GoldMine server to update information.

If the undocked computer you are upgrading or installing works remotely, see "Upgrading Remote Systems" on page 2-36.

Notes:

- If installing an Undocked version of GoldMine while it is in your office, disconnect the laptop from the network so you install a completely independent copy on the computer.
 - An Undocked user install is intended for purpose of synchronization. While the following instructions creates the installation, these instructions do not address GoldSync setup. Refer to online Help for instructions on setting up GoldSync.
-

1. On the undocked computer, navigate to the **gm7setup.exe** file. Double-click to run the executable. The **Welcome to the GoldMine Installation Wizard** dialog box appears.
2. Click **Next**. The **Readme** dialog box appears.
3. Click **Next**. The **License Agreement** dialog box appears.
4. Review the licensing information carefully; if you agree to the terms, select **I accept the terms in the license agreement**.

Note: If you do not agree to the terms of the license agreement, select **I do not accept the terms in the license agreement**. Click **Cancel** to terminate the installation.

5. Accepting the terms of the agreement activates the subsequent check boxes. You must select both check boxes to continue with the installation.

IMPORTANT: Select **I am an authorized agent and/or representative of the customer/end-user** and **I have read the terms and conditions stated above** to continue.

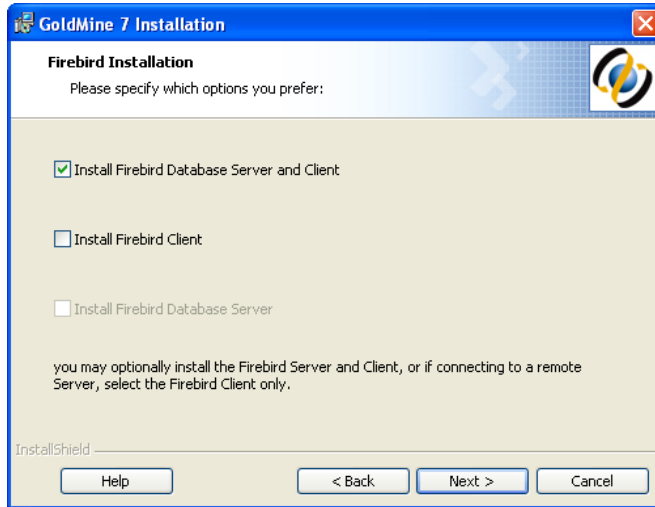

6. Click **Next**. The **Installation Type** dialog box appears.

7. Select one installation type:
 - **New Install:** If GoldMine was never installed.
 - **Upgrade:** If you are upgrading from a previous version of GoldMine.
8. Click **Next**. The **Setup Type** dialog box appears.
9. Select **GoldMine Corporate Edition Setup**.
10. Click **Next**. The **Networking Operations** dialog box appears.

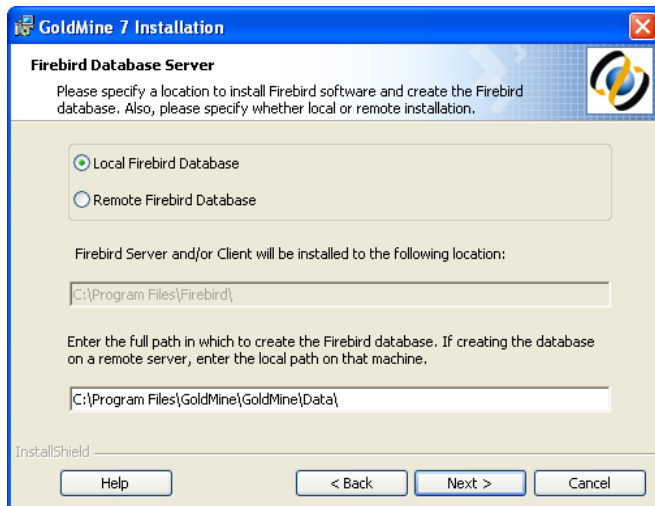

11. Select **Undocked**.
12. Click **Next**. The **Language Type** dialog box appears.
13. Select a language.
14. To install the demonstration data in the database, select **Install Demo Data with GoldMine 7.0**.
15. Click **Next**. The **Target Location** dialog box appears.
16. To install GoldMine to a location other than the path displayed, click **Change**. The **Change Current Destination Folder** dialog box appears. Type a path or browse to the folder where you want GoldMine installed. To return to the **Target Location** window, click **OK**.

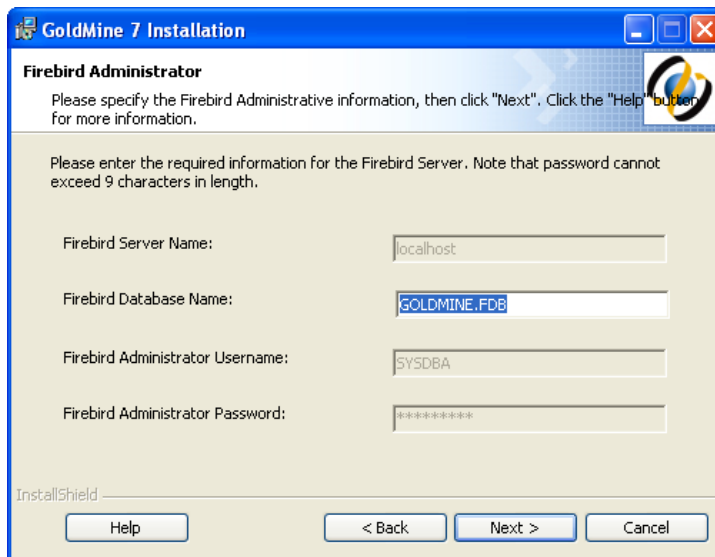

17. Click **Next**. The **Firebird Installation** dialog box appears.

18. Select **Install Firebird Database Server and Client** because the undocked computer must be self-sufficient.
19. Click **Next**. The **Firebird Database Server** dialog box appears.

20. Select **Local Firebird Database**: because the undocked computer must be self-sufficient.
21. By default, the **Firebird Server/Client** are installed to C:\Program Files\Firebird.
22. By default, the **Firebird database** is installed to **C:\Program Files\GoldMine\GoldMine\Data**. Accept the default or type an alternative path. The location must already exist and be writable.
23. Click **Next**. The **Firebird Administrator** dialog box appears.

24. Accept the default or specify the appropriate information:
 - **Firebird Server Name:** Name of remote server.
 - **Firebird Database Name:** Name of new Firebird database.
 - **Firebird Administrator Username:** Security user name.
 - **Firebird Administrator Password:** Security password.

Note: Change the user name and password after installation is complete. Administrative access to Firebird is available through the ISQL command line tool and using free tools from www.flamerobin.org.

25. Click **Next**. The **Firebird GoldMine Database Administrator** dialog box appears.

26. Accept the default or specify the appropriate database login information:
- **Firebird Database User:** Default autofills if installing locally. For remote, the user must already exist for the database.
 - **Firebird Database User Password:** Default autofills if installing locally. For remote, the user must already exist for the database.
 - **Confirm Password:** Retype password to confirm.

Note: Administrative access to Firebird is available through the ISQL command line tool and using free tools from www.flamerobin.org.

27. Click **Next**. The **Ready to Install the Program** dialog box appears.
28. Click **Install**. The **Installing GoldMine** dialog box appears.
29. When finished, the **Installation Completed** dialog box appears.
30. Click **Finish**.

 The Welcome to GoldMine dialog box appears to begin the licensing process. See Chapter 3, "Licensing Following Installation."

Upgrading Remote Systems

This type of upgrade is for computers working disconnected from a GoldMine server but synchronizing with the main GoldMine server to update information—a remote Site or an Undocked computer.

If you are upgrading a Site, the Master installation provides the site administrator with the **gm7setup.exe**.

See "Installing on a Server (SQL Database)" on page 2-8.

If updating an undocked computer, the Master installation provides the undocked computer user with the **gm7setup.exe**.

See "Running an Undocked Computer Installation" on page 2-31.

IMPORTANT: If you are upgrading the server but are not upgrading a remote system until a later date, disable the site in the GoldSync Administration Center until it is running the same version of GoldMine as the server.

1. Upgrade the Master GoldMine site.
2. After upgrading the Master site, you can upgrade remote computers by sending them a **gm7setup.exe** installation file using one of these methods:
 - One-button Synchronization
 - CD-ROM
 - FTP site
 - E-mail
 - Accessible network drive
3. Remote users should run the installation CD or the **gm7setup.exe** on their computer following these upgrade instructions.
4. After remote users upgrade to the same version of GoldMine as the server, they can begin synchronizing again.

Licensing and Registration

Overview

GoldMine has a fully scalable licensing structure to meet the needs of individuals and organizations. As your business matures and GoldMine expands, your organization can change the licensing configurations.

General Licensing Information

The single, distributed Master License serves as the authentication mechanism for secure synchronization across the entire organization, and the License Manager keeps track of your licensing configurations.

Most organizations generally buy one license – a **Master License** with x number of seats. These seats can then be parsed to users in various combinations of sub-licenses. For example, an organization can create Site sub-licenses for their remote office(s) and Undocked sub-licenses for individual remote (mobile) users. One seat should always be set aside for administrators.

License Types

- **Master License:** This is the primary license. It determines what database types are supported by the master site as well as its synchronization capabilities. It is a precursor to executing any sub-licenses which stem from it.

GoldSync and Outlook Integration licenses are issued concurrent with the E or D license.

The licensing serial number schema for Master licenses was changed for the 7.0 release, but remains the same for sub-licenses. See "License Serial Number" on page 3-4.

- **Sub-licenses:** To issue, install GoldMine with a Master License on your organization's primary network. This ensures all sub-licenses maintain security and are authenticated properly during synchronization.

The Undocked license (a special sub-license) is for remote users and can only be licensed for a single user. It can be sub-licensed from the main GoldMine system or from a Site sub-license.

- **Increases:** Previous increases for Corporate Edition, Standard Edition, and GoldSync (J, R, and N), are now facilitated by obtaining a new E, D, or G license (which account for the increase and the Master license count).

Master License		
E	Corporate Edition License	Supports SQL databases and includes GoldSync
D	Standard License	Supports Firebird only; GoldSync purchased separately
G	GoldSync Master License	GoldSync seats purchased separately and can be added to D- or E-Licenses
O	GoldMine Outlook Integration Services License	Outlook integration purchased separately for a D-License or to increase number of users with E-License
Sub-licenses		
U	Undocked License	Single sub-license for a remote GoldMine user
S	Site License	Multiple-user sub-license for a remote office
Y	GoldSync License	GoldSync sub-license for a remote office

License Serial Number

The schema for the serial number has changed. Because of the new licensing schema, the GoldMine installer will not upgrade your license. This example illustrates what a GoldMine license serial number looks like:

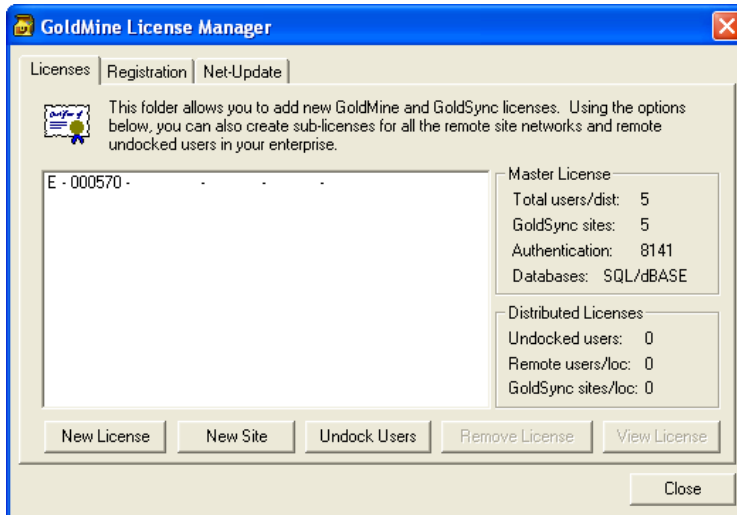

- **License type:** Alpha-prefix denotes the type of Master license.
- **Number of users:** First 4 numbers indicate the license count or seats available in the license. The license count determines the number of users who can log on to GoldMine at one time but does not limit the total number of named users.
- **Version:** A 2-digit version number.
- **HDA number:** Your 6-digit HDA number.
- **Serial number:** 15-character (alphanumeric) serial number uniquely identifying the license for an organization. It is used for registration and support and identifies all sub-licenses as part of the same organization. Collected in 3 groups of 5 characters during licensing.
- **Key code:** 15-character (alphanumeric) key code is a computer-generated check used by GoldMine to verify the license's validity. Collected in 3 groups of 5 characters during licensing.

Note: The key code is required during installation. Keep the license number and key code in a safe place in the event it becomes necessary to reinstall the software.

License Manager

Initial licensing information is collected during installation. Subsequent changes and related management functions are handled through the **License Manager**.

From the GoldMine **File** menu, select **Configure>>License Manager**.

The central text box lists all installed licenses and any sub-licenses created from this location. Status is displayed along the right side. Buttons along the bottom allow you to add a **New License**, add a **New Site**, add an **Undocked User**, **Remove License**, or **View License**.

The database support of the Master License is inherited by the site sub-licenses distributed throughout the organization. GoldSync Synchronization capabilities can be distributed separately to sub-licenses.

IMPORTANT: Licensing information is stored in the license file, **License.bin**, created at the time you register. This file must exist only in the GoldMine root directory of each GoldMine installation.

Additional License Manager information is provided in the online Help.

Licensing with a Master License

The Master License serial number for GoldMine Standard Edition begins with the alpha-prefix D (*Example:* D-002068-111111...). A GoldMine Corporate Edition Master License begins with the alpha-prefix E (*Example:* E-005070-111111...).

The E-license is usually a multi-user license for a server installation of GoldMine but may be a single-user license for a stand-alone computer.

A D-license does not include GoldSync licenses. The necessary number of GoldSync licenses (G-licenses) can be purchased and added as needed.

An E-license includes a GoldSync license for each purchased GoldMine seat.

Remote site sub-licenses (S- and Y-licenses) and Undocked sub-licenses (U-licenses) are created from the D- and E-license.

Type the **D-** or **E-license** number and key code you received when you purchased the software.

IMPORTANT: If you type an E-license serial number into the text boxes, the GoldSync text box area remains unavailable because GoldSync is included. However, it must be purchased separately with a D-License, so while typing the serial number in the text boxes, the GoldSync area becomes available. Type your G-license information at that time, or later using License Manager. You do not need to type the G-License number to proceed with licensing GoldMine.

Licensing Following Installation

1. After the installation completes, a **licensing wizard** launches.

IMPORTANT: If you do not complete the license and registration information after installation, the licensing wizard launches prior to first use of GoldMine.

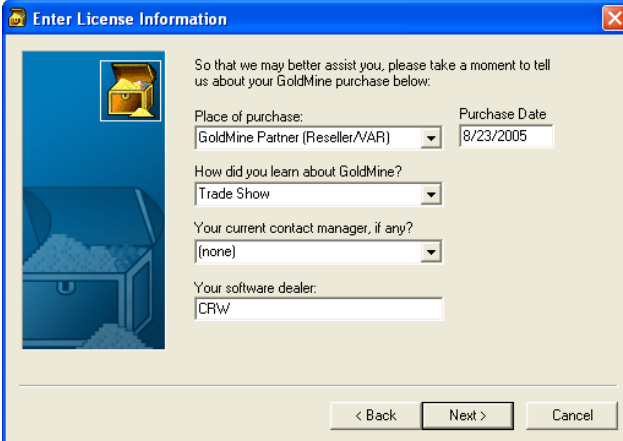

The **Welcome** window appears.

2. Click **Next**. The **Enter License Information** dialog box appears.

3-8 Licensing and Registration

3. Provide your contact information in the designated text boxes to continue. All fields are **required**.
4. Select the check box to receive future product information. Clear the check box if you do not.
5. Click **Next**. The **Enter License Information** dialog box appears.

The "Enter License Information" dialog box has a blue title bar and a close button. On the left is a graphic of a treasure chest. The main area contains the following fields:

- Place of purchase: GoldMine Partner (Reseller/VAR) (dropdown)
- Purchase Date: 8/23/2005 (text box)
- How did you learn about GoldMine?: Trade Show (dropdown)
- Your current contact manager, if any?: (none) (dropdown)
- Your software dealer: CRW (text box)

At the bottom are three buttons: "< Back", "Next >", and "Cancel".

6. Complete the purchase information. These fields are optional.
7. Click **Next**. The **Enter GoldMine Serial Number** dialog box appears.

The "Enter GoldMine Serial Number" dialog box has a blue title bar and a close button. On the left is a graphic of a treasure chest. The main area contains the following fields:

- Please enter your GoldMine Serial Number and Key Code below:
- GoldMine Serial Number: E - [] - [] - [] - [] - [] (text box)
- Key Code: [] - [] - [] (text box)
- If you have a GoldSync® Serial Number and Key Code, please enter it below to activate GoldMine's automated, remote synchronization server GoldSync®:
- GoldSync Serial Number: [] [] [] [] [] [] (text box)
- Key Code: [] [] [] (text box)

At the bottom are three buttons: "< Back", "Next >", and "Cancel".

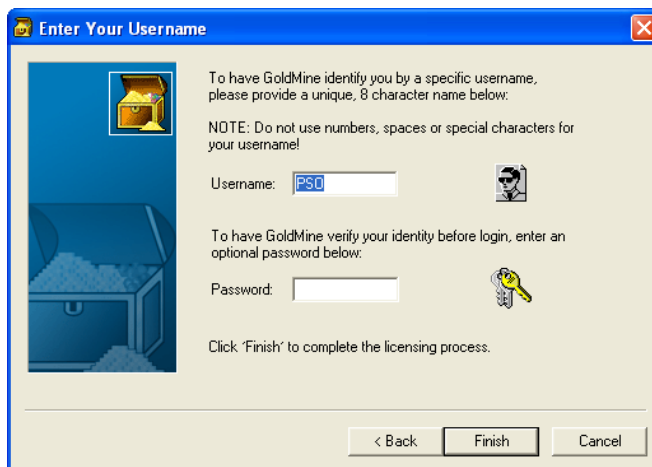

8. Type your GoldMine serial number and key code. Options appearing in this dialog box depend on type of license purchased.
9. Click **Next**. The **Import NT Server User Accounts** dialog box appears.

10. Select each user account you want to import into GoldMine. If appropriate, type an optional password for imported names.

IMPORTANT: Imported users do not have “master” rights.

11. Click **Next**. The **Enter Your Username** dialog box appears.

3-10 Licensing and Registration

12. Type a user name (eight characters or fewer). The password is optional. GoldMine requests these at log in. This user has Master Rights in GoldMine.
13. Click **Finish**. The **GoldMine Logon** dialog box appears.

14. Type the user name and password.
15. Click **OK** to launch GoldMine.

Creating Sub-licenses

After GoldMine is installed and licensed, you can parse seats to your end users with sub-licenses using the License Manager. You must have a Master License to create sub-licenses.

CAUTION: Plan before creating sub-licenses, keeping in mind each sub-license transfers seat availability which affects how many users can log in on the network system. For example, on the License tab of the License Manager, if the **Total users/dist:** shows a total number of seats and the total number of sub-licenses as “50\20,” only 30 seats are available to users. At a minimum, one seat should always be set aside for administrators only.

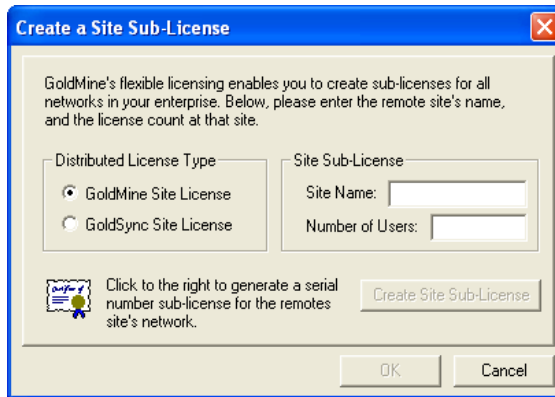

Creating Sub-licenses for Remote Offices

From a Master License, you can create sub-licenses for remote offices. Remote office sub-licenses can be a **Site License (S-license)** and/or a **GoldSync License (Y-license)**.

Each “S” and/or “Y” sub-license transfers seat availability from non-remote users. A minimum of one seat must remain available to non-remote users. For example, you must have at least 5 seats to make GoldMine available to 4 remote offices. Headquarters retains the fifth seat.

Note: When creating any sub-license, note the entire license number created by GoldMine. The sub-license includes the key code and additional information needed when licensing the remote computer. The information only displays in its entirety during the creation process.

1. From the **GoldMine** menu, select **File>>Configure>>License Manager**. The **License Manager** appears.
2. Click the **Licenses** tab.
3. Click **New Site**. The **Create a Site Sub-License** dialog box appears.

4. In the **Distributed License Type** area, select the site license you want to create — **GoldMine Site License (S-License)** for the number of seats the site needs or **GoldSync Site License (Y-License)** for the number of users who are synchronizing, including at least one for the site.

Tip: Write the sub-license number down or copy it to Windows Notepad. The sub-license number is needed for each remote computer installation. Send the remote site license number to the remote user who can type the license number during the GoldMine installation.

5. In the **Site Sub-License** area, type the site name and number of users.
6. Click **Create Site Sub-License**. The **Site-License for Remote Site** dialog box appears.
7. Review the information about the sub-license and click **I Agree**. The sub-license number for the site appears in the **Sub-license for Remote Site [Name of Site]** dialog box.
8. If you created a Site license, repeat the above process to create the necessary GoldSync license and select GoldSync Site License.

Note: GoldMine adds the sub-license to the list of licences on the Licenses tab of the License Manager.

Creating Sub-licenses for Undocked Users

GoldMine has a sub-license for an individual user called an **Undocked License (U-License)**. This license type is created for users who work primarily with GoldMine at a remote location on a laptop, notebook, or home office computer but who may also need to log on to the network occasionally. Consider:

- Creating an undocked user decreases the available users of the network site (Master License or Site License) by one; however, when an undocked user logs on to the site from which they were sub-licensed, they do not take up an additional seat.
- Every user supported by the GoldMine license can have an Undocked license to work on a remote computer. For example, on a 5-user GoldMine system, 5 Undocked licenses can be created. This is in contrast to creating an “S” sub-license which requires one seat to remain available from the Master License.
- All undocked users, as well as the total number of users that make up the difference in the total number allowed by the Master License can log on to GoldMine. For example, on a 5-user GoldMine system with 3 undocked users, 3 undocked users plus 2 other users can log on to GoldMine.

WARNING: If you undock all users, only those users will be able to log in. If you have not assigned master rights to any of those undocked users, GoldMine administration cannot take place.

- When used in combination with GoldSync, administrators can synchronize security settings to undocked users including new passwords, menu items, and preferences in addition to data.
- To work on an undocked basis, users must have an Undocked license on their laptop. Create an Undocked license from the Master License or a Site license.

1. From the **GoldMine** main menu, select **File>> Configure>>License Manager**. The **License Manager** appears.
2. Click the **Licenses** tab and **Undock Users**. The **Create Undocked User Licenses** dialog box appears.

3. Select the check box next to the user you want to create a sub-license for, and click **Create Undocked License**. The **Sub-Licenses** dialog box appears.
4. Review the information and click **I Agree**. The sub-license number for a remote user or an undocked user appears in the **Sub-license for Remote Site [Name of Site]** dialog box.

Tip: Write the sub-license number down or copy it to Windows Notepad. The sub-license number is needed for each remote computer installation. Send the remote site license number to the remote user who can type the license number during the GoldMine installation.

Licensing with Sub-licenses

Site License

A Site License is a multiple-user sub-license for a remote office and is designated with the alpha-prefix "S." You should have an **S-license** for each user at the remote site.

A GoldSync License (**Y-license**) is required only if you are using an S-license and want to synchronize using GoldSync. You should have one Y-license to synchronize with the Master License and additional Y-licenses for Undocked users synchronizing with your site.

Note: Y licenses are not entered in the Enter GoldMine Serial Number dialog box. Only S licenses are entered during registration (the GoldSync Section remains disabled). Clicking **Next** displays an **ALERT: Suggested Action(s)!** if you try to enter Y licenses in the Enter GoldMine Serial Number dialog box.

If this installation of GoldMine includes its own GoldSync sites, you may enter the applicable Y-type sub-licenses to properly configure synchronization for this system.

1. To configure applicable sub-license sites, select **File>>Configure>>License Manager** to enter your Y-type license.
2. In the **GoldMine Serial Number** text boxes, type the **S-license**, **Key Code**, and **Site Code** you created in the License Manager of the main GoldMine system.
3. In the **GoldSync Serial Number** text boxes, type the **Y-license**, **Key Code**, and **Site Code** you created in the License Manager.

Undocked License

Undocked licenses are sub-licenses created from a Master License or a Site license and are designated by the letter "U." This license type is created for users who work with GoldMine at another location, on a laptop, or on a workstation disconnected from the server copy of GoldMine.

Type the **U-license**, **Key Code**, and **Site Code** created in the License Manager.

For more on licensing, see GoldMine online Help.

Configuring

Overview

After installation, system administrators must configure GoldMine to meet the needs of the organization. Some preliminary setup is presented in this chapter. Additional configuration steps are presented in the online Help.

Configuration Considerations

In developing a GoldMine deployment strategy, the GoldMine administrator must carefully plan how the GoldMine database should run and determine who is going to use it.

- Creating users, user groups, security rights, and preferences including menu rights
- Changing field labels
- Creating user-defined fields and tabs
- Setting up expanded details
- Generating and modifying F2 Lookup lists

To enhance GoldMine, configure other areas:

- Automated Processes
- Reports

To import existing databases into GoldMine, plan the migration by asking yourself:

- Is it essential to keep all existing data?
- How out of date is the data?
- Are all fields in the existing database required in GoldMine?

For details on the procedures in these configuration points, see the Administration item in the GoldMine online Help Table of Contents, accessed by selecting **Help>>Help Topics** on the GoldMine menu bar.

Placing a Custom Image in the Logon Window

To display your organization's logo or other graphic on GoldMine's logon screen correctly, the file must be a bitmap within a size limit of 150 x 250 pixels. The bitmap cannot exceed 150x250 pixels or 150x177 pixels when using a D-license with a G-License.

Note: GM.ini is a special initialization file that stores settings that apply globally to all users running the same installation of GoldMine.

Place the bitmap file in the root GoldMine directory. Using a text editor such as Windows Notepad, open GM.ini. Under the **[GoldMine]** section, add this line:

UserLogo=<path\filename>

For example, if you place the graphics file MyLogo.bmp in your GoldMine directory, type this statement:

UserLogo=C:\GoldMine\MyLogo.bmp

Save GM.ini, then exit the text editor. Open GoldMine to display the changed login screen.

Granting Access Privileges in Windows XP

Overview

Microsoft Windows XP Professional has enhanced system security restricting access to applications to all users except the installing user. Having a Windows XP logon does not grant access to an application.

Access privileges must be granted to any additional users who want to use an application on the system. To do this, you must:

- Change GoldMine ownership
- Grant permission to use GoldMine

Note: If upgrading from GoldMine 5.7 (Business Contact Manager) installed on Windows XP Professional, consult your GoldMine 5.7 documentation regarding the "realini" setting in the GM.ini file.

Changing GoldMine Ownership in Windows XP

Windows XP (Professional version) enhances system security by granting access to installed applications only to the installing user.

If GoldMine was installed on your system using a different Windows XP logon user name and password and you do not know the Windows XP logon that was used, you can change the permission settings with an administrator-level account.

CAUTION: If running Window XP, Windows 2000 Professional, Windows 2000 Server, or Windows 2003 Server, you must be logged on as a Power User or local administrator or be part of a Power User or administrator group. Consult Microsoft Windows online Help.

1. Log on as an administrator or as a user with equivalent rights.
2. Navigate to **Program Files\ GoldMine**. Right-click to display the local menu, then select **Properties**.
3. Click the **Security** tab.
4. Click the **Advanced** button.
5. Click the **Owner** tab.
6. In the **Change Owner To** area, select the user you want to make the owner.
7. Select **Replace owner on subcontainers and objects**.
8. Click **OK**.
9. On the **GoldMine Properties** dialog box, click **OK** to save and close.

Granting Permission to Use GoldMine in Windows XP

Windows XP's enhanced security requires the administrator to grant privileges to each additional user who wants to use an application on the system.

CAUTION: If running Window XP, Windows 2000 Professional, Windows 2000 Server, or Windows 2003 Server, you must be logged on as a Power User or part of a Power User group. Consult Microsoft Windows online Help.

1. Navigate to **Program Files\ GoldMine**. Right-click to display the local menu, then select **Properties**.
2. Click the **Sharing** tab.
3. Select **Share this folder**.
4. Click **Permissions**.
5. On the **Share Permissions** tab, select **Add**.
6. Select the user or user group to grant access to.
7. Click **OK** to return to the **Share Permissions** window.
8. Select the data access permissions you want to allow or deny to the selected users or user groups. GoldMine users must have full control. Click **OK**.
9. Click the **Security** tab.
10. In the **Group or user names** area, select the users you want to define access privileges for.
11. Select the GoldMine application permissions you want to allow or deny to the user or user group. GoldMine users must have full control.
12. Click **OK**.

Firebird Information

Overview

Firebird is an open-source SQL solution. When you select a Firebird database during installation of GoldMine 7.0, a working copy of Firebird 1.5 is installed. See "Installing on a Server (Firebird Database)" on page 2-17.

Obtain the source code and documentation for Firebird from the downloads page at <http://www.ibphoenix.com>.

After GoldMine installation, the license files can be found in the **Program Files\Firebird\Firebird_1_5** folder.

Obtain a copy of this source code license from the Firebird Project Web site at: <http://www.firebirdsql.org/index.php?op=doc&id=idpl>.

Minimum Firebird 1.5 Client Install

This appendix describes how to run Firebird 1.5-based applications with the minimum client installation required.

DLL Sharing and Access

- **fbclient.dll**: Give your application access to the Firebird client library, fbclient.dll by placing the fbclient.dll in the same directory as your application's .exe file.
- **msvcp60.dll and msvcrt.dll**: Give fbclient.dll access to these dll's. Both are delivered with the Windows installation of Firebird; if you have a Firebird server installed on your development computer, find these dll's in the bin directory of your Firebird installation.
 - **msvcp60.dll** can remain in your application directory.
 - **msvcrt.dll** (Microsoft Visual C/C++ RunTime) is a part of Windows and resides in the **Windows\System** directory on Win9x computers and in **Windows\System32** on NT-based computers (NT4, W2K, XP, 2003).
 - **msvcrt.dll version numbers**:
 - Firebird 1.5.0--1.5.2, 6.00.8797.0
 - Windows XP SP1, 7.0.2600.1106
 - Windows XP SP2, 7.0.2600.2180

Note: For Workstation installations with Firebird, use Option 2 (see "Running a Workstation Installation" on page 2-25).

Delphi, IbObjects

A “normal” InterBase access library uses gds32.dll as the client library. Firebird's client library is named fbclient.dll. When you use IbObjects (www.ibobjects.com), you can set another client library name.

- Include IB_Constants.pas as the first unit in your USES clause
- Place the following line in the INITIALIZATION part of your Unit:
IB_Constants.IB_GDS32 := 'fbclient.dll';

This line must be executed before the first database connect is performed.

Using Firebird With The Windows XP SP2 Firewall

The firewall included with Windows XP SP2 blocks port 3050, which the Firebird databases use. If you use a Firebird database and cannot access GoldMine from a workstation, either disable the Windows firewall or adjust your security settings to enable port 3050. You can adjust your Windows Firewall settings from the Security Center on the Control Panel.

Installing Microsoft SQL Server 2000 or 2005

Overview

The GoldMine Server Setup requires you to install Microsoft SQL Server 2000 or 2005 before installing GoldMine.

The Microsoft SQL Server CD included with your GoldMine Corporate Edition package provides complete installation instructions in the Microsoft online Help.

The following instructions include installation procedures and settings pertinent to GoldMine but should not be considered a SQL Server administrator's guide. Only experienced SQL administrators should configure SQL Server with anything other than the settings described in these instructions.

Installing Microsoft SQL Server 2000

The server on which you are installing Microsoft SQL Server 2000 *must* have Windows NT 4.0 Server (SP5) or Windows 2000 Server or Windows 2003 Server operating system installed prior to installing SQL Server 2000. Windows 2000 Server (any version) is required for some SQL Server 2000 features.

If you are using an NT 4.0 Server as your SQL 2000 Server, you cannot install GoldMine to the same computer. GoldMine requires one of the following Windows operating systems:

- Windows 2000 Professional
- Windows XP Home
- Windows XP Professional

Note: SQL Server 2000 on Windows NT 4.0 Terminal Server is not supported by Microsoft.

1. Insert the Microsoft SQL Server 2000 Installation CD into the CD/DVD drive of the computer on which you are installing SQL.

Note: The SQL Server 2000 Installation CD is set up to autorun when inserted into your CD/DVD drive. If autorun is not enabled, select Run from the Start button on the Windows taskbar, and then type `x:\autorun.exe` (where “x” is the letter of the CD/DVD drive).

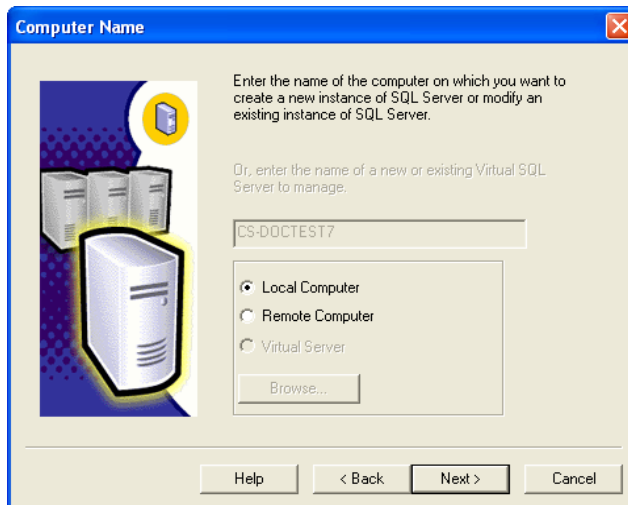

The main window appears.

2. Select **SQL Server 2000 Components**. The **Install Components** window appears.

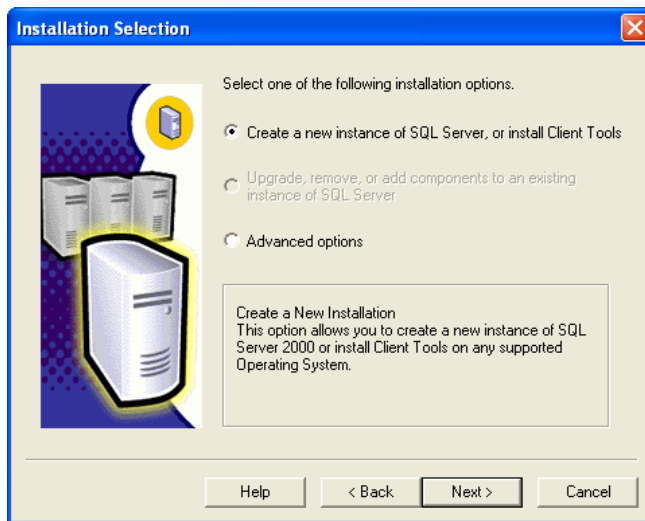

3. Select **Install Database Server**. The Standard Edition installation window appears with a Welcome dialog box.
4. On the **Welcome to Microsoft SQL Server Installation Wizard** dialog box, click **Next**. The **Computer Name** dialog box appears.

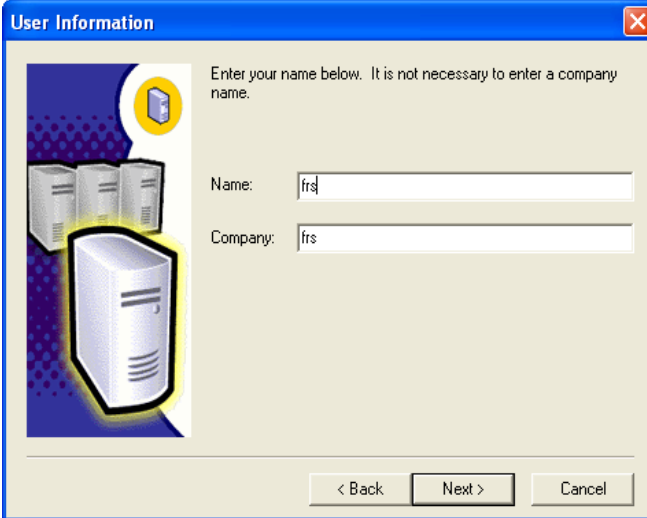

5. Select **Local Computer**. Click **Next**.

Note: Although the installer permits installation from a workstation to the server, we do not recommend using this procedure. Please install directly on the server.

The **Installation Selection** dialog box appears.

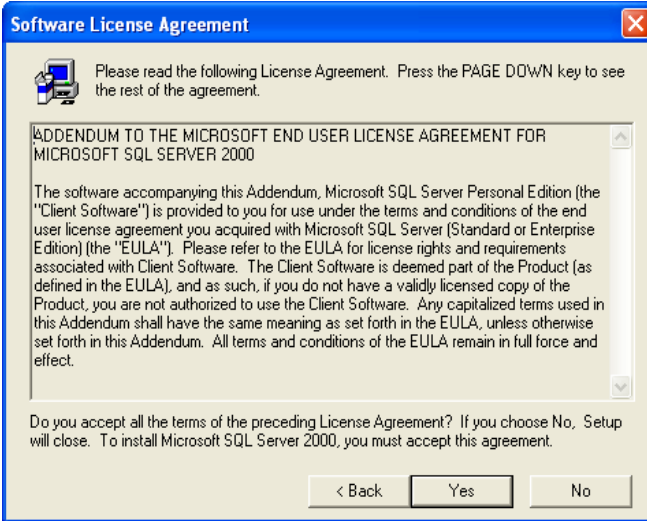

6. Select **Create a new instance of SQL Server, or install Client Tools**. Click **Next**. The **User Information** dialog box appears.

The **User Information** dialog box has a blue title bar with the text "User Information" and a close button. On the left is a graphic of server racks. The main area contains the text "Enter your name below. It is not necessary to enter a company name." Below this are two text boxes: "Name:" with the text "frs" and "Company:" with the text "frs". At the bottom are three buttons: "< Back", "Next >", and "Cancel".

7. Type your name and company, then click **Next**. The **Software License Agreement** dialog box appears.

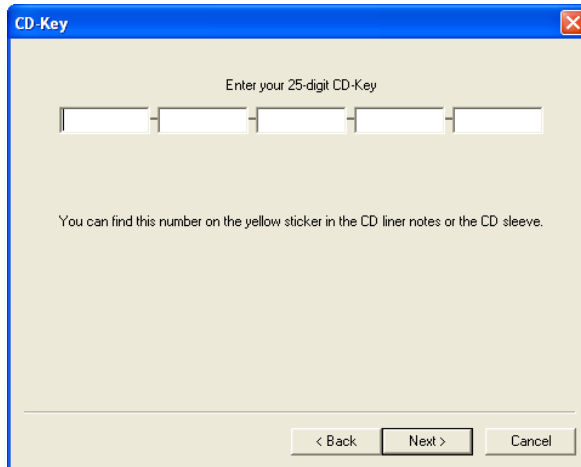

The **Software License Agreement** dialog box has a blue title bar with the text "Software License Agreement" and a close button. On the left is a small icon of a computer. The main area contains the text "Please read the following License Agreement. Press the PAGE DOWN key to see the rest of the agreement." Below this is a large text box containing the following text: "ADDENDUM TO THE MICROSOFT END USER LICENSE AGREEMENT FOR MICROSOFT SQL SERVER 2000

The software accompanying this Addendum, Microsoft SQL Server Personal Edition (the "Client Software") is provided to you for use under the terms and conditions of the end user license agreement you acquired with Microsoft SQL Server (Standard or Enterprise Edition) (the "EULA"). Please refer to the EULA for license rights and requirements associated with Client Software. The Client Software is deemed part of the Product (as defined in the EULA), and as such, if you do not have a validly licensed copy of the Product, you are not authorized to use the Client Software. Any capitalized terms used in this Addendum shall have the same meaning as set forth in the EULA, unless otherwise set forth in this Addendum. All terms and conditions of the EULA remain in full force and effect."

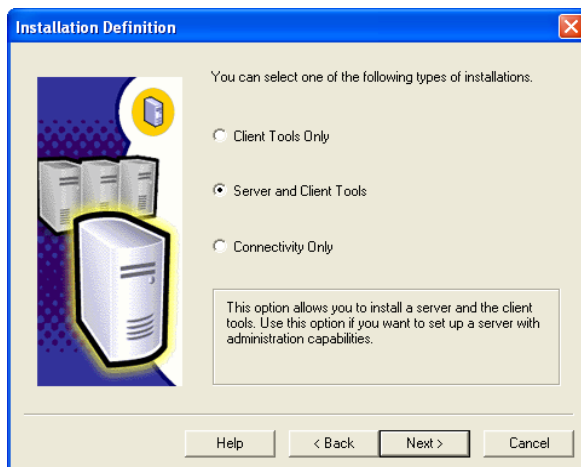

Below the text box is the question: "Do you accept all the terms of the preceding License Agreement? If you choose No, Setup will close. To install Microsoft SQL Server 2000, you must accept this agreement." At the bottom are three buttons: "< Back", "Yes", and "No".

8. Read the licensing information. Click **Yes** to agree with the terms of the license agreement or **No** if you do not agree and wish to cancel the installation process.

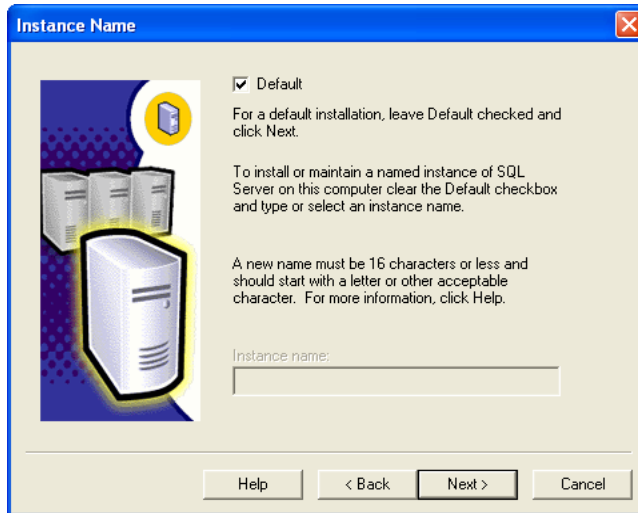

If you select Yes, the **CD-Key** dialog box appears.

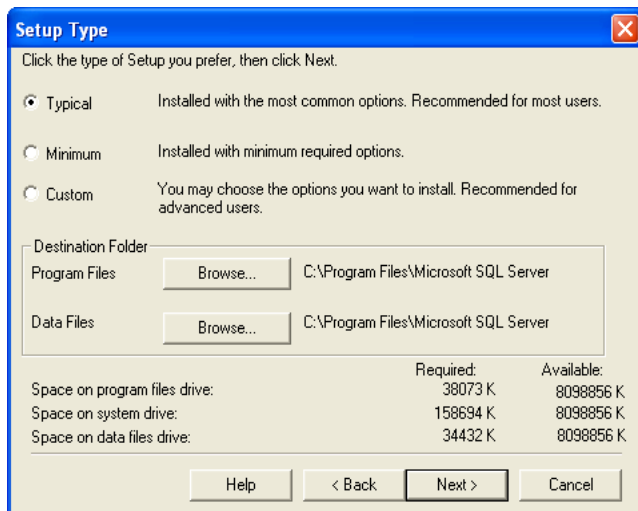

9. Type the SQL license number as it appears on your Delivery Notes and License Certificate, then click **Next**. The **Installation Definition** dialog box appears.

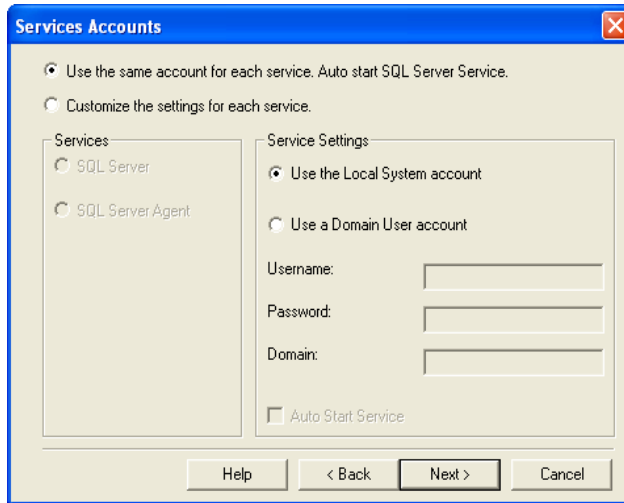

10. Select **Server and Client Tools**. Click **Next**. The **Instance Name** dialog box appears.

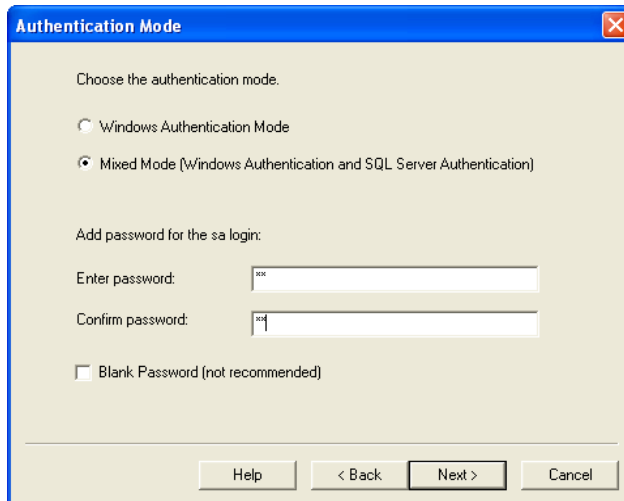

11. Leave **Default** selected. Click **Next**. The **Setup Type** dialog box appears.

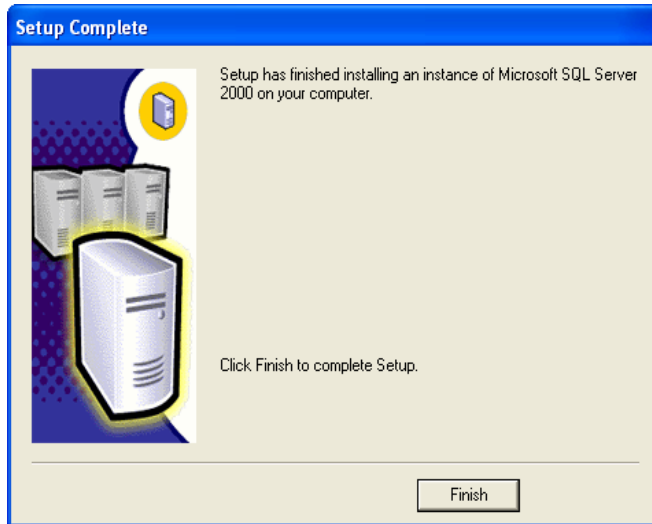

12. Select **Typical** with no changes to the default destination folders. Click **Next**. The **Services Accounts** dialog box appears.

13. Select **Use the same account for each service. Auto start SQL Server Service** and **Use the Local System account**.
14. Click **Next**. The **Authentication Mode** dialog box appears.

15. Select **Mixed Mode**. Select **Blank Password**. Click **Next**. The **Start Copying Files** dialog box appears.
16. On the **Start Copying Files** dialog box, click **Next**. The **Setup Complete** dialog box appears.

17. Select **Yes, I want to restart my computer now**, and then click **Finish**.

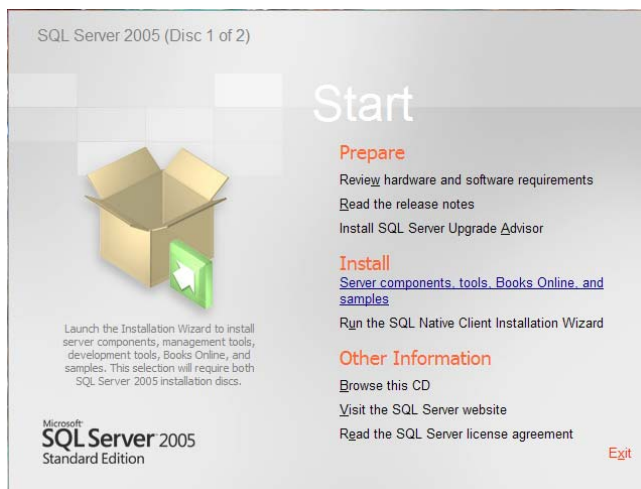

Installing Microsoft SQL Server 2005

The server on which you are installing Microsoft SQL Server 2005 *must* have one of the following operating systems: Microsoft Windows 2000 Server with SP4 or later; Windows 2000 Professional Edition with SP4 or later; Windows XP with SP2 or later; Windows Server 2003 Enterprise Edition, Standard Edition, or Datacenter Edition with SP1 or later; Windows Small Business Server 2003 with SP 1 or later.

1. Insert the Microsoft SQL Server 2005 Installation CD into the CD/DVD drive of the computer on which you are installing SQL.

Note: The SQL Server 2005 Installation CD is set up to autorun when inserted into your CD/DVD drive. If autorun is not enabled, select Run from the Start button on the Windows taskbar, and then type x:\autorun.exe (where “x” is the letter of the CD/DVD drive).

The main window appears.

2. Select **SQL Server 2005 Components....** The **End User License Agreement** window appears. To install SQL Server 2005, you must accept the terms of the End User License Agreement.

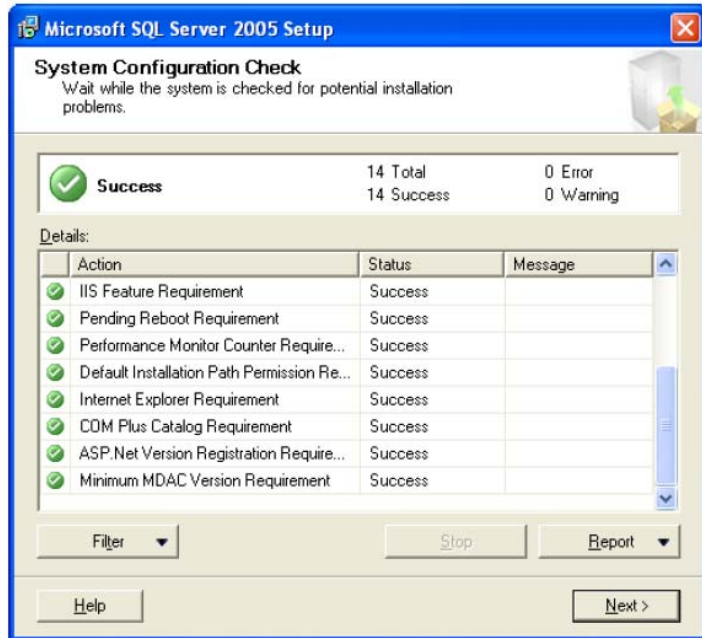

3. When you have reviewed and accepted the terms, click **Next**. The **Installing Prerequisites** window appears.

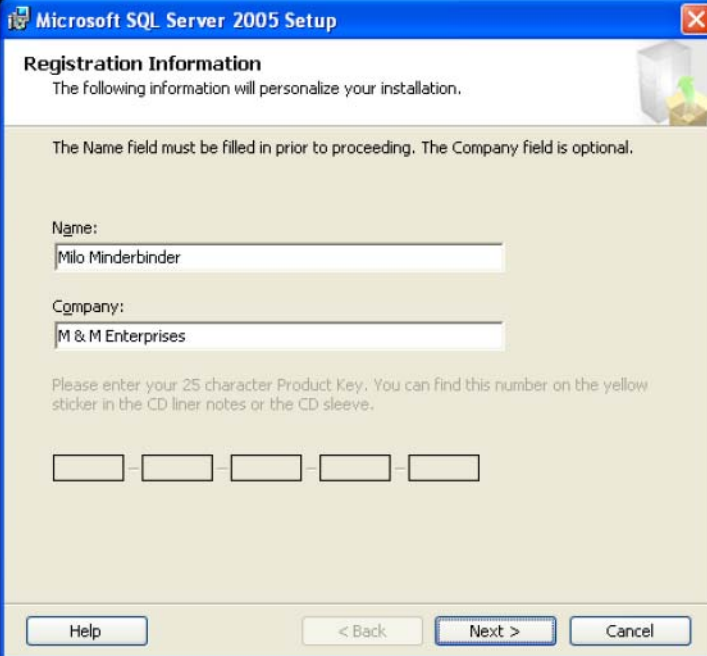

4. Click Install. After the software prerequisites are installed, click **Next**. The **Welcome** window appears.

5. Click **Next**. The **System Configuration Check** window appears.

6. When the system configuration check is complete, click **Next**. The **Registration Information** window appears.

The screenshot shows the "Microsoft SQL Server 2005 Setup" window with the "Registration Information" tab selected. The window has a blue title bar and a standard Windows XP-style border. The main content area is light beige. At the top, the title "Registration Information" is in bold, followed by the text "The following information will personalize your installation." and a small icon of a box with a green arrow. Below this, a note states: "The Name field must be filled in prior to proceeding. The Company field is optional." There are two text input fields: "Name:" with the text "Milo Minderbinder" and "Company:" with the text "M & M Enterprises". Below these fields, a message says: "Please enter your 25 character Product Key. You can find this number on the yellow sticker in the CD liner notes or the CD sleeve." This is followed by five empty text boxes separated by hyphens. At the bottom, there are four buttons: "Help", "< Back", "Next >" (which is highlighted with a blue border), and "Cancel".

Microsoft SQL Server 2005 Setup

Registration Information
The following information will personalize your installation.

The Name field must be filled in prior to proceeding. The Company field is optional.

Name:
Milo Minderbinder

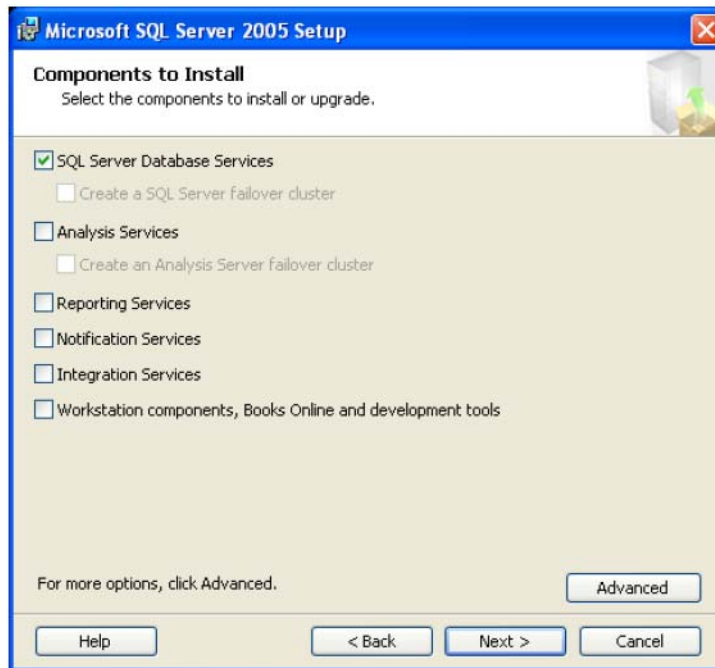

Company:
M & M Enterprises

Please enter your 25 character Product Key. You can find this number on the yellow sticker in the CD liner notes or the CD sleeve.

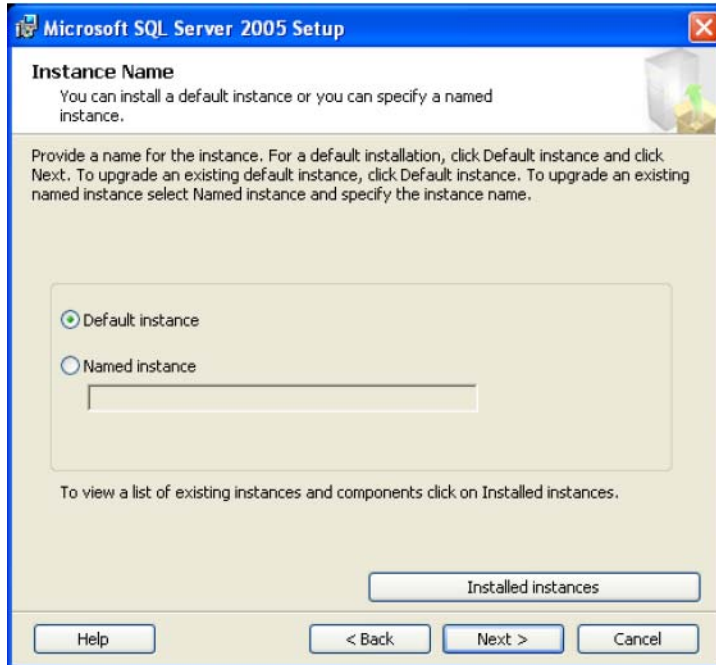

- - - -

Help < Back Next > Cancel

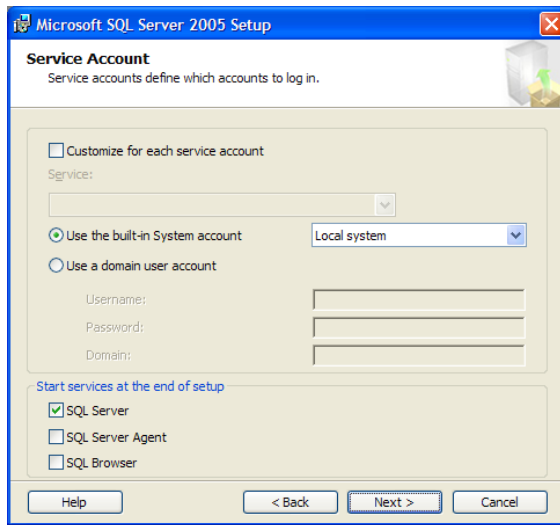

7. Click **Next**. The **Components to Install** window appears.

8. Select **SQL Server Database Services** and **Workstation components, Books online and developmental tools**, then click **Next**. The **Instance Name** window appears.

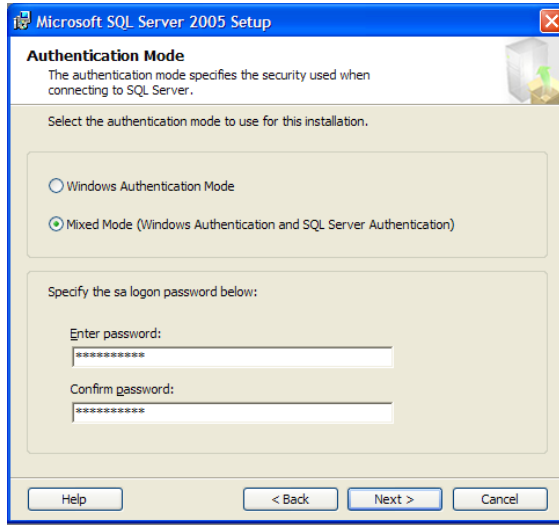

9. Leave **Default** selected. Click **Next**. The **Service Accounts** dialog box appears.

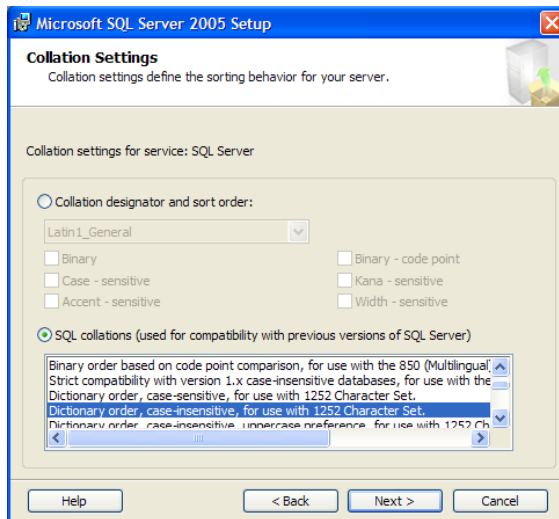

10. Select **Use the built-in sytem account >> Local System**. Under **Start services at the end of setup**, check **SQL Server**.

11. Click **Next**. The **Authentication Mode** dialog box appears.

12. Select **Mixed Mode** and enter an sa logon password. Click **Next**. The **Collation Settings** window appears.

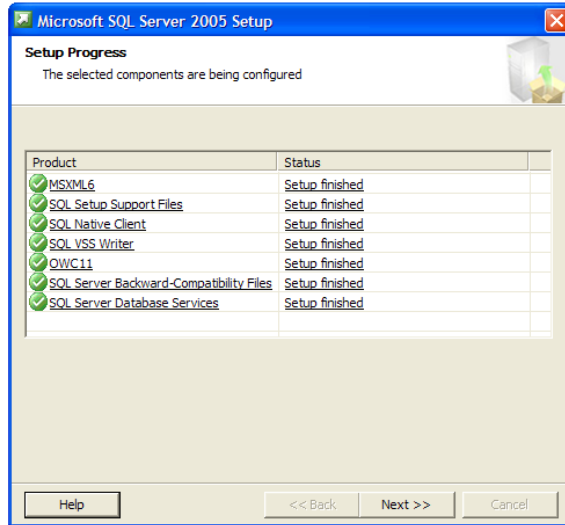

13. From the SQL collations, choose the default. The **Error and Usage Report Settings** window appears.

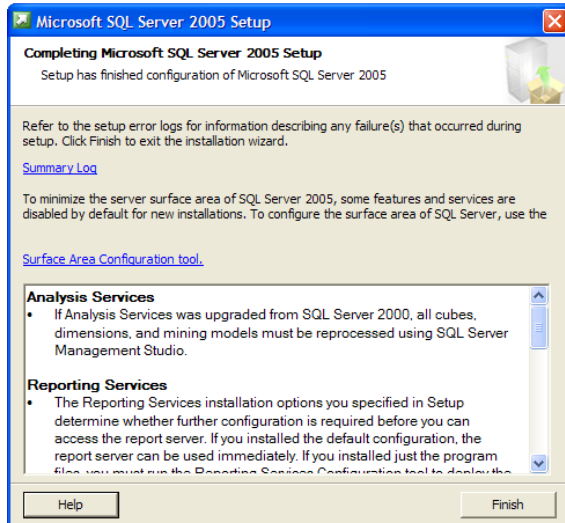

14. If you wish MSSQL Server 2005 to automatically send your error messages and usage reports to Microsoft, check the appropriate box. Otherwise, leave them blank. Click **Next**. The **Ready to Install** window appears.

15. Click **Next** to proceed with the installation. The **Setup Progress** window appears.

16. When the installer completes the setup process, click **Next**. The **Completing Microsoft SQL Server 2005 Setup** window appears.

17. Click **Finish** to exit the installation wizard.

18. Select **Start>>All Programs>> Microsoft SQL Server 2005>>Configuration Tools>>SQL Server Configuration Manager**. The SQL Server Configuration Manager launches.
19. On the left pane, expand the **SQL Server 2005 Network Configuration** section, and select **Protocols for MSSQLSERVER**.
20. On the right pane, locate and select the protocol name **Named Pipes**.
21. Right-click on **Named Pipes** and select **Enable**. The following warning message appears:
Any changes made will be saved, they will not take effect until the service is stopped and restarted.
Select **OK**.
22. Exit the **SQL Server Configuration Manager**.
23. In Windows, go to **Start>>Control Panel>>Administrative Tools>>Computer Management**.
24. Expand **Services and Applications** and select **Services**.
25. Stop and restart the service **SQL Server (MSSQLSERVER)**.

Troubleshooting SQL Errors when Installing GoldMine

If you receive an error message such as **MSSQL Login Failed** during the installation of GoldMine, check the following:

- *Is the SQL server running? If not, start SQL Server.*

Open the MSSQL Enterprise Manager and find **SQL Server Enterprise Manager**. Expand the servers until you see your server name. Right-click your server name and select **Start** in the local menu.

- *Is the SQL administrative name and password you typed when installing GoldMine different from the name and password in SQL? Are you using **sa** with no password, or did you change it in SQL?*

Open the SQL Server Enterprise Manager. Expand Microsoft SQL Server and then expand SQL Server Groups. Right-click your server name and select **Edit SQL Server Registration properties**. Verify the login name and password.

- *When you installed SQL, did you select Mixed Mode for the authentication mode?*

If you do not know, go to the server name in the MSSQL Enterprise Manager. Expand Microsoft SQL Server and then expand SQL Server Groups. Right-click your server name and select **Properties**. Select the **Security** tab. Select **SQL Server and Windows**. Stop and restart SQL Server. The installation continues.

Installing Management Intelligence

Overview

Whether you work in support, sales, or marketing, Manager's Console and Answer Wizard take all the information collected from front line contacts—including call histories, open support tickets, and forecasts—and deliver that information to the rest of the organization. These tools track and disseminate information, they actually transform the information in your company into an asset.

- **Manager's Console:** Manager's Console provides at-a-glance summaries of the overall status of a Support Center or sales department. It allows managers to proactively review and manage critical business issues and facilitate future responses to recurring problems.
- **Answer Wizard:** Answer Wizard is a management-reporting tool for a supervisor or manager. Answer Wizard not only provides immediate answers to the questions managers are asking, but also coaches them to understand the additional questions they should ask.

Installing Management Intelligence

Management Intelligence can only be installed from the Installation CD. This CD is set up to autorun when inserted into your CD-ROM drive.

Note: If autorun is not enabled, select Run from the Start button on the Windows taskbar, and type: x:\setup.exe (where “x” is the letter of your CD-ROM drive).

The **CD Browser** initiates the installation process, allowing you to install, browse the CD, view Documentation, or exit.

Available from the **Documentation** browser are the ReadMe and a PDF copy of this Installation Guide. Documentation is also available from the Help menu in most modules.

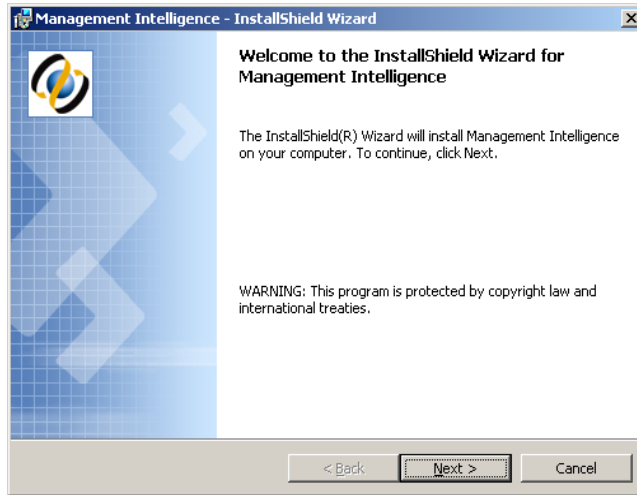

The **Installation Wizard** walks you through the installation process step by step. Windows and dialog boxes clearly outline important information, features, and directions. To navigate through the Installation Wizard, follow the directions in the windows and dialog boxes. To cancel the installation and exit the wizard at any time, click Cancel.

1. Insert the Installation CD into your CD-ROM drive. The **CD Browser** appears.

2. Select **Install Management Intelligence**.

The **Management Intelligence Installation Wizard** appears.

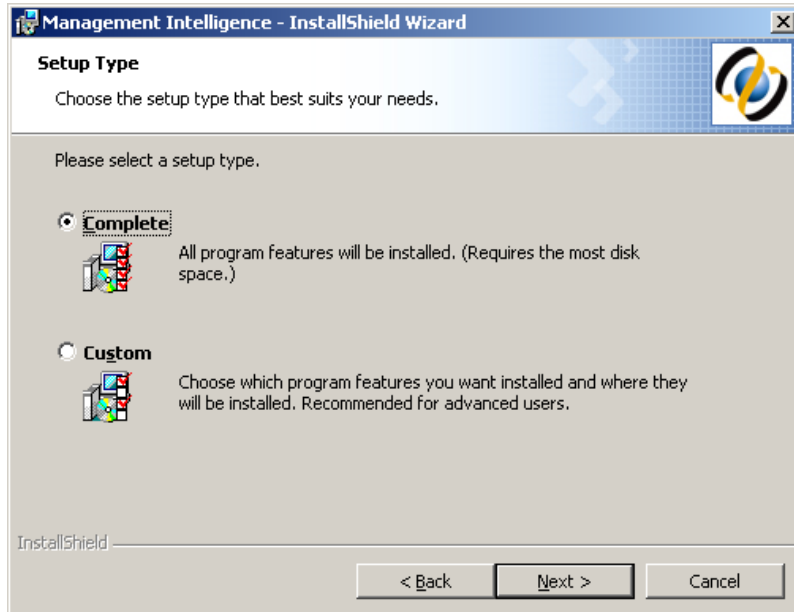

3. Click **Next**. The **Readme** dialog box appears.
4. Click **Next**. The **License Agreement** dialog box appears.
5. Review the licensing information carefully; if you agree to the terms, select **I accept the terms in the license agreement**.

Note: If you do not agree to the terms of the license agreement, select **I do not accept the terms in the license agreement**. Click **Cancel** to terminate the installation.

6. Accepting the terms of the agreement activates the subsequent check boxes. You must select both check boxes to continue with the installation.

IMPORTANT: Select **I am an authorized agent and/or representative of the customer/end-user** and **I have read the terms and conditions stated above** to continue.

7. Click **Next**. The **Setup Type** dialog box appears.

8. Select **Complete**.
9. Click **Next**. The **Ready to Install the Program** dialog box appears.
10. Click **Install**. The **Installing GoldMine** dialog box appears. When finished, the **Installation Completed** dialog box appears.
11. Click **Finish**.

Initial Setup

Manager's Console and Answer Wizard are installed. Next, launch Answer Wizard to configure the data sources and load the reports.

Establishing the ODBC

1. From **Start**, select **Programs>>GoldMine>>Answer Wizard**. The **Answer Wizard** main window appears.

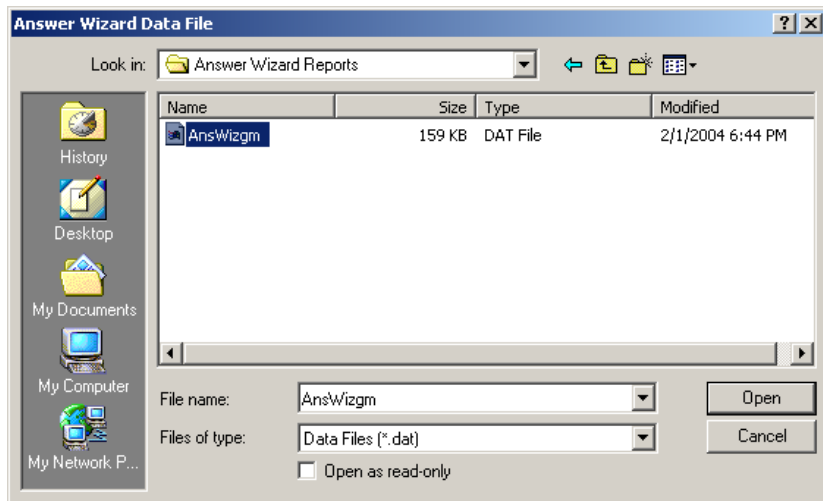

2. Click **Preferences**.

The **User Preferences** dialog box appears.

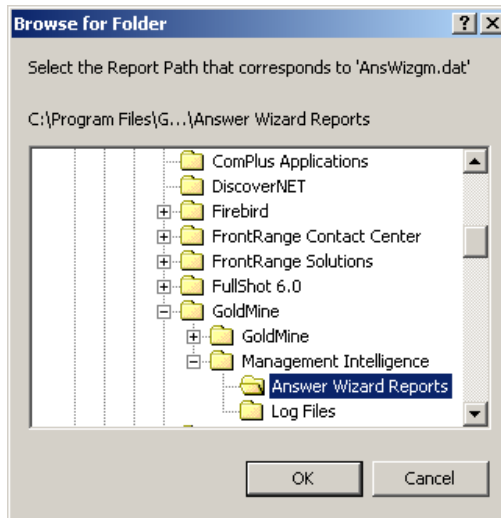

3. Use the **Options** tab to set the paths to the data file and reports. Click **Add**. The **Answer Wizard Data File** dialog box appears.

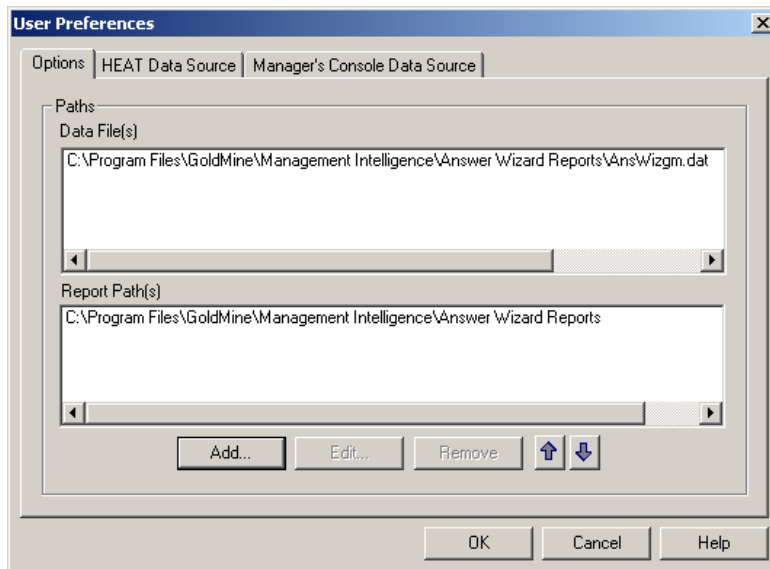

4. Navigate to the **AnsWizgm.dat** file, located in the **GoldMine\Management Intelligence\Answer Wizard Reports** folder.

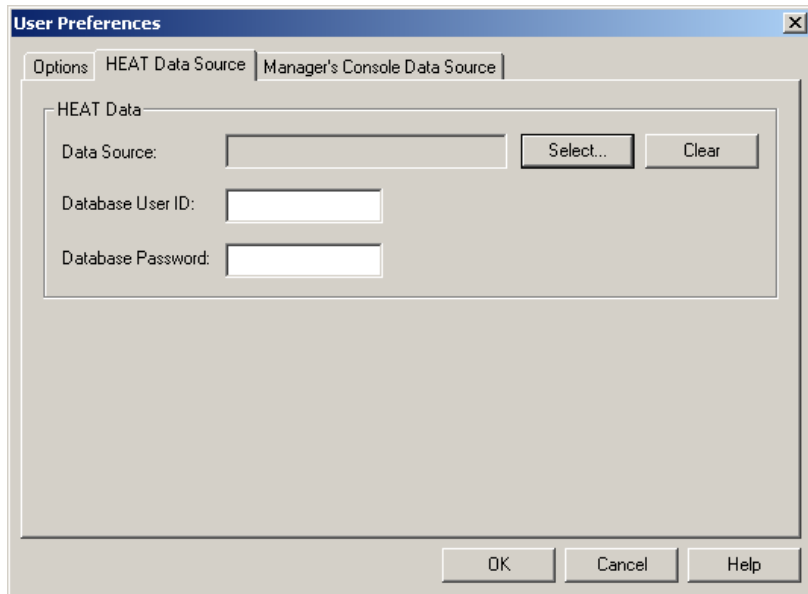

5. Click **Open**. The **Browse for Folder** dialog box appears.

6. Verify the path is correct and click **OK**. The **User Preferences** dialog box reappears with paths defined.

7. Click the **HEAT Data Source** tab.

8. Click **Select**. The **Select HEAT Data Source** dialog box appears.

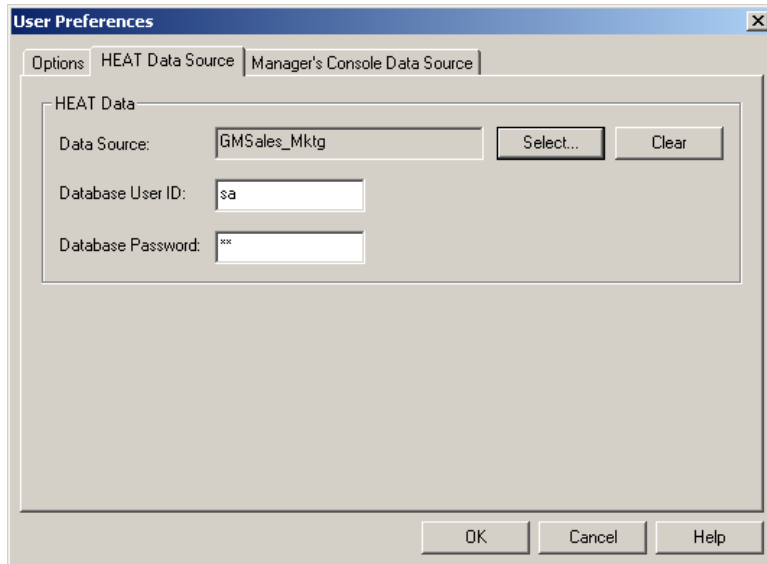

9. In the drop-down list, select **GMSales_Mktg**.

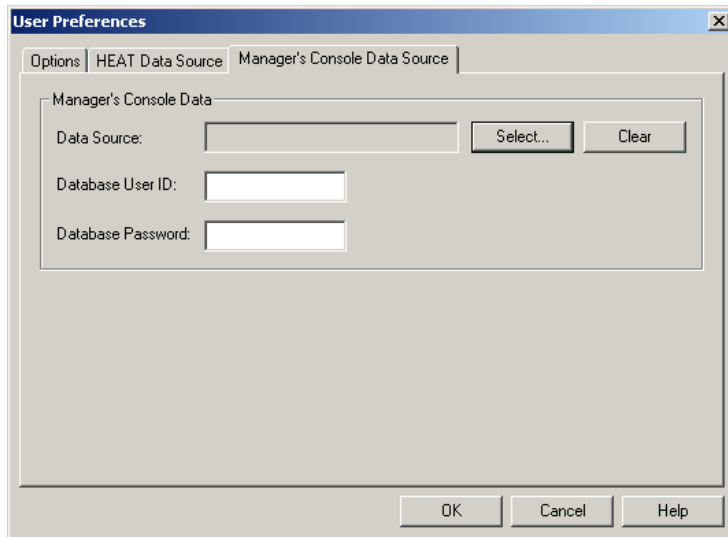

10. Click **OK**. The **SQL Server Login** dialog box appears.

11. Type the **Login ID** and **Password** for SQL Server.
12. Click **OK**. The **HEAT Data Source** tab reappears.

13. Click the **Manager's Console** tab.

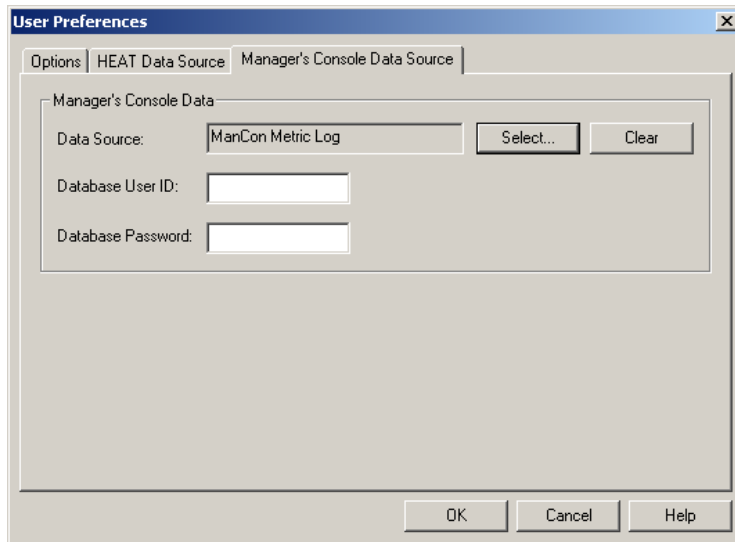

14. Click **Select**. The **Select Manager's Console Data Source** dialog box appears.

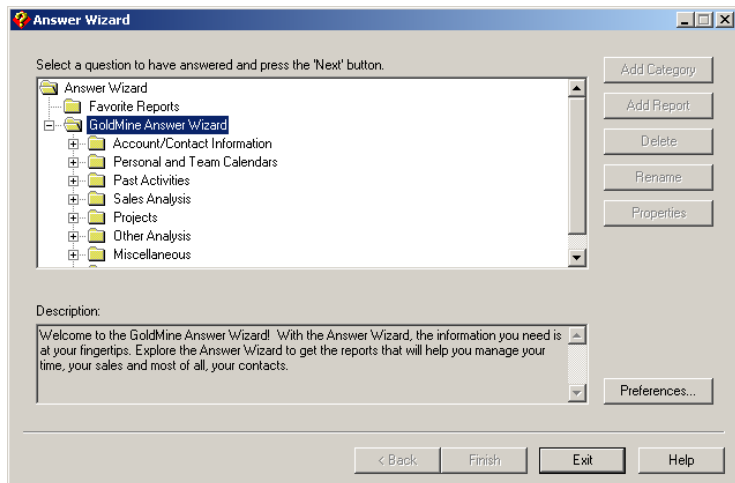

15. In the drop-down list, select **ManCon Metric Log**.

16. Click **OK**. The **Manager's Console Data Source** tab reappears.

17. Click **OK**. The **Answer Wizard** main window reappears. Notice the GoldMine reports now appear in the tree.

18. Click **Exit**.

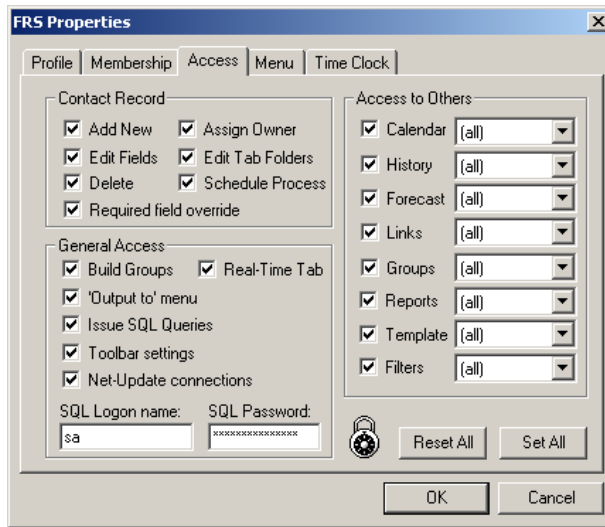

Verifying the SQL Login

1. From **Start**, select **Programs>>GoldMine>>GoldMine**. The GoldMine Login appears.
2. Log into GoldMine as the local administrator.
3. From the **File** menu, select **Configure>>User's Settings**. The **User's Master File** dialog box appears.

4. Select the local administrator user.
5. Click **Properties**. The **Properties** dialog box appears.

6. Click the **Access** tab.

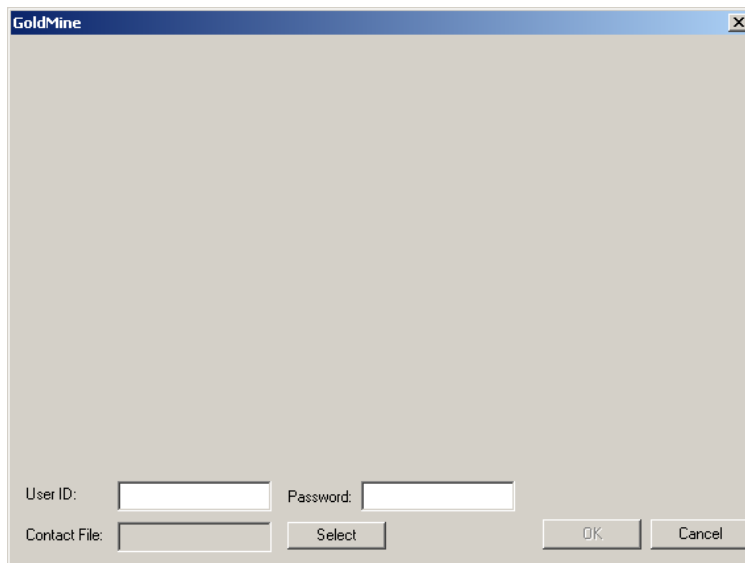

7. Ensure the **SQL Logon name** and **SQL Password** are correct (such as, **sa** and **sa**).
8. Click **OK**. The **User's Master File** dialog box reappears.
9. Click **Close**.

Starting Manager's Console

1. From **Start**, select **Programs>>GoldMine>>Manager's Console**. The **Manager's Console — Start Mode** dialog box appears.

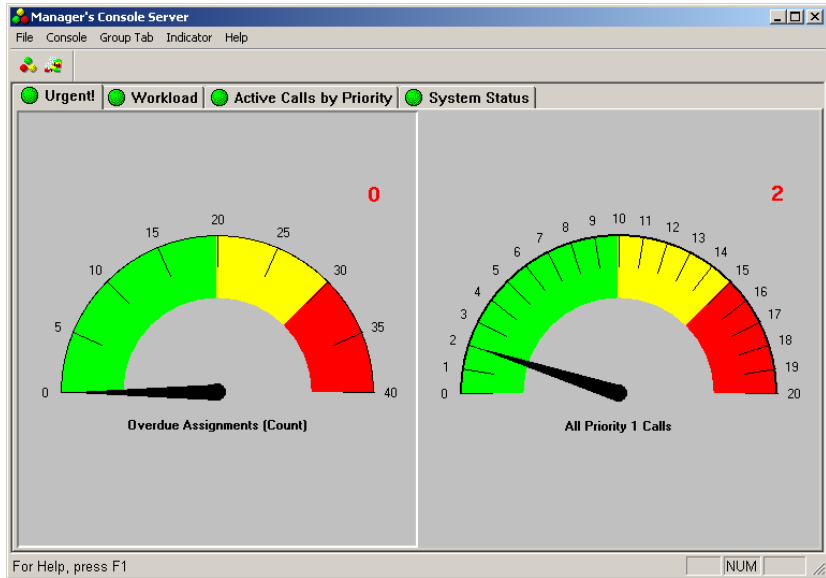

2. Select **Start as Server**.
3. Click **OK**. The **GoldMine** login dialog box appears.

4. Type the GoldMine **Login ID** and **Password**.

5. Click **OK**. The **Manager's Console Server** opens.

 See the online Help in both applications for information on using these tools.

Migrating Large Databases

Overview

If you are upgrading from a previous version of GoldMine to 7.0 and have a large Microsoft SQL Server database (5GB of data or more), we recommend you consider the following steps before proceeding with the upgrade. Certain computers (limited computing power) require manual steps to upgrade the database successfully.

Note: These steps do not apply to Firebird databases.

IMPORTANT: If your upgrade has already failed, see "Failure During Upgrade" on page E-4.

Database Preparation

1. **BACKUP YOUR DATABASE.** This is especially important prior to migration. Also, a power failure or any unpredicted interruption may corrupt data. Invaluable data can be restored from the backup.
2. Truncate the transaction log.
 - From **Start**, select **Microsoft SQL Server>>Query Analyzer**.
 - Run:

```
backup database_name with truncate_only
```
3. Purge the **syslog** table from GoldMine 6.7 (or your current version). Ensure you have backed up your database prior to purging.
 - To purge logs, select **View>> GoldMine Logs**. The **System Logs** dialog box appears. Select either **Process Monitor Logs**, **Maintenance Logs**, or **Error Logs**. Right-click for a menu. Select **Purge Logs**.
 - Select the check boxes for **Process Monitor**, **Maintenance**, and **Error** logs. Accept the default date (1 month) or adjust to extend. If you require more logs, revise according to the GoldMine online Help or the Administrator Guide.

Executing the Upgrade Process

With databases of nominal size, the install routine changes the tables listed below. Only use steps 8-14 as a guide to change the table structure as indicated below if the row size is exceptionally large (such as >500K rows):

- a. CAL's Number2 field changed from INT to FLOAT.
- b. OPMGR's F3 field changed to size 20.
- c. SITEID from SYSLOG changed to 40.
- d. SITEID from GSSITES changed to 40.
- e. CONTHIST Units field from size 8 to 20.

Note: If any unpredictable event such as power failure, system crash occurs, you could potentially lose data or data corruption can occur. A backup allows you to ensure a smooth transition. You may want to restore the back up and restart the steps.

1. From **Start**, select **Microsoft SQL Server>>Enterprise Manager**. The **Enterprise Manager** appears.
2. In the **Console Root** tree, expand **Microsoft SQL Servers**.
3. Expand **SQL Server Group**.
4. Expand **local** (or server name).
5. Expand **Databases**.
6. Expand the **GoldMine** database.
7. Select **Tables**.
8. Select **CONTHIST**.
9. Right-click for a menu and select **Design Table**.
10. Under **Column Name**, navigate to the **Units** field.
11. In the **Length** column, change the number from 8 to 20.
12. Close the **Design Table** dialog box. The message **Do you want to save changes to table CONTHIST** appears.
13. Click **Yes** to save changes. The hourglass appears.
14. Wait for the changes to update the database structure. This may take some time.
15. When complete, close **Enterprise Manager**.
16. Start the GoldMine 7.0 Installer to upgrade the process.

Failure During Upgrade

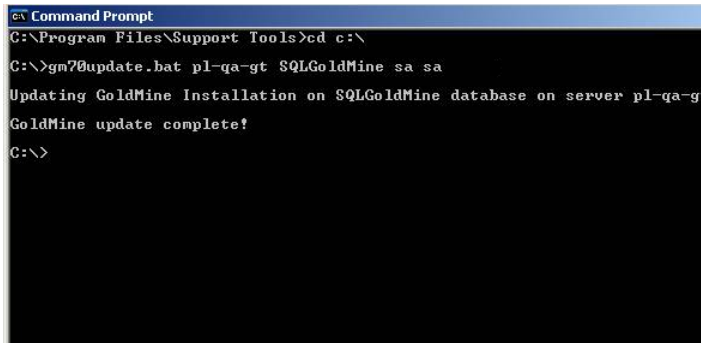

Take the following steps if, during migration, you received an error such as:

- Unit Conversion in CONTHIST
- Unit Conversion in CAL
- Unit Conversion in CONTSUPP

Note: This error may prevent you from logging in to GoldMine or immediately after logging into the application, the GoldMine application disappears.

1. In your Web browser, open: **<http://support.frontrange.com>**
2. Select **Maintenance Customer Support>>Online Support**.
3. Log into the support site.
4. Select **Drivers and Downloads**.
5. From the drop-down list, select GoldMine Corporate Edition.
6. Locate and download “**Unit Conversion Error During GoldMine 7.0 Upgrade.**”
7. Execute the patch in the DOS prompt by passing the right parameters:

GM70Update SERVER_NAME DATABASE_NAME USERID PASSWORD

```

C:\ Command Prompt
C:\Program Files\Support Tools>cd c:\
C:\>gm70update.bat pl-qa-gt SQLGoldMine sa sa
Updating GoldMine Installation on SQLGoldMine database on server pl-qa-g
GoldMine update complete!
C:\>
```

8. Log into GoldMine 7.0 application

Note: Contact FrontRange Solutions' Customer Support for more information.
